Second Quarter Fiscal 2026 Financial Highlights

- Consolidated net revenue in Q2 FY2026 was \$67MM, representing an increase of 6% compared to the second quarter ended September 30, 2024 ("Q2 FY2025").
 - Cannabis net revenue in Q2 FY2026 was \$51MM, representing an increase of 12% compared to Q2 FY2025.
 - Canada adult-use cannabis net revenue in Q2 FY2026 was \$24MM, representing an increase of 30% compared to Q2 FY2025. The increase was primarily attributable to growth in infused pre-roll joints ("PRJ") and new All-In-One vapes from Tweed and 7ACRES which launched in the three months ended June 30, 2025 ("Q1 FY2026").
 - Canada medical cannabis net revenue in Q2 FY2026 was \$22MM, representing an increase of 17% compared to Q2 FY2025 driven by an increase in the number of insured patients, increased order sizes, and a larger assortment of cannabis product choices offered to our patients.
 - International markets cannabis net revenue in Q2 FY2026 was \$5MM, representing a decrease of 39% compared to Q2 FY2025. The decrease was primarily attributable to supply chain challenges in Europe.
 - Storz & Bickel net revenue in Q2 FY2026 was \$16MM, representing a decrease of 10% compared to Q2 FY2025. The decrease was primarily attributable to lapping strong sales in the prior year and continued consumer economic uncertainty in key markets, offset by our new product launch of the VEAZY™ in September 2025.
- Consolidated gross margin in Q2 FY2026 was 33%, representing a decrease of 200 basis points ("bps") compared to Q2 FY2025. Consolidated gross margin in Q2 FY2026 increased sequentially by 800 bps compared to Q1 FY2026.
 - Cannabis gross margin was 31% in Q2 FY2026 as compared to 36% in Q2 FY2025. This decrease was primarily attributable to lower sales of higher margin international markets cannabis and higher inventory provisions, partially offset by top line growth in Canada adult-use cannabis and Canada medical cannabis and efficiency improvements in the production of manufactured cannabis products.

- o Storz & Bickel gross margin in Q2 FY2026 was 38%, representing an increase of 600 bps compared to Q2 FY2025. Gross margin in Q2 FY2025 was depressed due to discounts provided to clear out remaining stock of previously discontinued product.
- Selling, General and Administrative ("SG&A") expenses decreased 13% year-over-year in Q2 FY2026 compared to Q2 FY2025. The Company has captured \$21MM of annualized savings since March 1, 2025 and continues to look for additional efficiencies.
- Operating loss from continuing operations was \$17MM in Q2 FY2026, representing an improvement of 63% compared to Q2 FY2025. The improvement was driven primarily by a reduction in operating expenses.
- Adjusted EBITDA¹ loss was \$3MM in Q2 FY2026, compared to \$6MM in Q2 FY2025, driven primarily by lower SG&A expenses.
- Year-to-date free cash flow² was an outflow of \$31MM as of Q2 FY2026 compared to an outflow of \$112MM as of Q2 FY2025. The year-over-year decrease in the free cash outflow primarily reflects a reduction in the cash interest payments due to timing of payments compared to the prior quarter and a reduction in our debt balances and year-over-year change in working capital movements.
- The Company made prepayments totaling US\$50MM against its senior secured term loan in Q2 FY2026.

Business Highlights

- Robust innovation pipeline of focused product formats and tighter alignment with cannabis boards and retailers is expected to help drive Canada adult-use cannabis top line growth in the second half of the fiscal year ending March 31, 2026.
- The Company's Kelowna-based DOJA cultivation facility now exclusively serves Spectrum Therapeutics medical patients, supporting growth and innovation in the high-value Canada medical cannabis business.
- The Company has mobilized a dedicated effort to improve supply chain execution in its European medical cannabis business. The Company expects operations to stabilize and improve as the Company exits the fiscal year ended March 31, 2026.
- A full quarter of VEAZY™ sales, including the ramp-up in the business-to-business channel, along with the typical strong sales around the holiday season, is expected to support sequential growth in Storz & Bickel net revenue in the third quarter ended December 31, 2025, though tariff-related pressures may offset the near-term performance in certain markets such as the United States.
- The Company is taking steps to meaningfully lower its cost of goods sold through streamlining processes, smart investments to deliver improved yield and quality, as well as tighter supplier management.

Non-GAAP Measures

Adjusted EBITDA is a non-GAAP measure used by management that is not defined by U.S. GAAP and may not be comparable to similar measures presented by other companies. Management believes Adjusted EBITDA is a useful measure for investors because it provides meaningful and useful financial information, as this measure demonstrates the operating performance of businesses. Adjusted EBITDA is calculated as the reported net income (loss), adjusted to exclude income tax recovery (expense); other income (expense), net; loss on equity method investments; share-based compensation expense; depreciation and amortization expense; asset impairment and restructuring costs; restructuring costs recorded in cost of goods sold; and charges related to the flow-through of inventory step-up on business combinations, and further adjusted to remove acquisition, divestiture, and other costs. Asset impairments related to periodic changes to the Company’s supply chain processes are not excluded from Adjusted EBITDA given their occurrence through the normal course of core operational activities. Accordingly, management believes that Adjusted EBITDA provides meaningful and useful financial information as this measure demonstrates the operating performance of businesses. The Adjusted EBITDA reconciliation is presented within this press release and explained in the Company’s Quarterly Report on Form 10-Q for the quarterly period ended September 30, 2025 (the “Form 10-Q”) filed with the Securities and Exchange Commission (“SEC”).

Free cash flow is a non-GAAP measure used by management that is not defined by U.S. GAAP and may not be comparable to similar measures presented by other companies. Management believes that free cash flow presents meaningful information regarding the amount of cash flow required to maintain and organically expand the Company’s business, and that the free cash flow measure provides meaningful information regarding the Company’s liquidity requirements. This measure is calculated as net cash provided by (used in) operating activities less purchases of and deposits on property, plant and equipment. The free cash flow reconciliation is presented within this press release and explained in the Form 10-Q filed with the SEC.
