Non-GAAP Financial Measures

DXP supplements reporting of net income with certain non-GAAP measurements, including EBITDA, Adjusted EBITDA, EBITDA Margin, Adjusted EBITDA Margin, and Free Cash Flow. This supplemental information should not be considered in isolation or as a substitute for the unaudited GAAP measurements. Additional information regarding EBITDA, Adjusted EBITDA, EBITDA Margin, Adjusted EBITDA Margin, Free Cash Flow and net debt referred to in this press release are included below under "Unaudited Reconciliation of Non-GAAP Financial Information".

The Company believes EBITDA provides additional information about: (i) operating performance, because it assists in comparing the operating performance of the business, as it removes the impact of non-cash depreciation and amortization expense as well as items not directly resulting from core operations such as interest expense and income taxes and (ii) the performance and the effectiveness of operational strategies. Additionally, EBITDA performance is a component of a measure of the Company’s financial covenants under its credit facilities. Furthermore, some investors use EBITDA as a supplemental measure to evaluate the overall operating performance of companies in the industry. Management believes that some investors’ understanding of performance is enhanced by including this non-GAAP financial measure as a reasonable basis for comparing ongoing results of operations. By providing this non-GAAP financial measure, together with a reconciliation to its most directly comparable GAAP financial measure, the Company believes it is enhancing investors’ understanding of the business and results of operations, as well as assisting investors in evaluating how well the Company is executing strategic initiatives. Free Cash Flow reconciles to the most directly comparable GAAP financial measure of cash flows from operations as provided below. We believe Free Cash Flow is an important liquidity metric because it measures, during a given period, the amount of cash generated that is available to fund acquisitions, make investments, repay debt obligations, repurchase shares of the Company's common stock, and for certain other activities.
