FORM 6-K

**REPORT OF FOREIGN PRIVATE ISSUER
PURSUANT TO RULE 13a-16 OR 15d-16
UNDER THE SECURITIES EXCHANGE ACT OF 1934**

For the month of June 2026
Commission File Number: 001-35284

Ellomay Capital Ltd.
(Translation of registrant's name into English)

18 Rothschild Blvd., Tel Aviv 6688121, Israel
(Address of principal executive office)

Indicate by check mark whether the registrant files or will file annual reports under cover of Form 20-F or Form 40-F.

Form 20-F ☒ [X] Form 40-F ☐ []

Explanatory Note

On June 30, 2026, Ellomay Capital Ltd. published an investors presentation (the “Presentation”). The Presentation is attached hereto as Exhibit 99.1.

Exhibit Index

This Report on Form 6-K of Ellomay Capital Ltd. includes the following document, which is attached hereto and incorporated by reference herein:

Exhibit 99.1 - June 2026 Investors Presentation

Signatures

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

Ellomay Capital Ltd.

By: /s/ Ran Fridrich

Ran Fridrich

Chief Executive Officer and Director

ELLOMAY CAPITAL LIMITED

Investor Presentation

June 2026

Legal Disclaimer

General - The information contained in this presentation is subject to, and must be read in conjunction with, all other publicly available information, including our Annual Report on Form 20-F for the year ended December 31, 2025, and other filings that we make from time to time with the SEC. Any person at any time acquiring securities must do so only on the basis of such person's own judgment as to the merits or the suitability of the securities for its purpose and only based on such information as is contained in such filings, having received all such professional or other advice as it deems right or appropriate under the circumstances and not in reliance on the information contained in the presentation. By making this presentation available, we do not provide advice and make no recommendation to buy, sell or otherwise trade our shares or any other securities or investments whatsoever. We do not warrant that the information is complete or accurate, nor will we bear any liability for any damage or losses that may arise from any use of the information. This presentation and any information contained herein do not constitute an offer to sell or the solicitation of an offer to buy any securities. No offering of securities shall be made in the United States except pursuant to registration under the US Securities Act of 1933, as amended, or an exemption from the registration requirement thereunder. Securities will only be issued in Israel pursuant to a valid prospectus under the Israeli Securities Law, 1968 or an exemption from the prospectus requirements under this law. Historical facts and past financials and operating results do not mean that future performance or results for any period whatsoever will necessarily match or exceed those of any previous year. This presentation and the information included herein are owned exclusively by the Company, and may not be published, distributed or used in any other way without first obtaining our express written approval.

Forward-looking information - This presentation contains forward-looking statements that involve material risks and uncertainties, including statements that are based on the current expectations and assumptions of the Company's management. All statements included in this presentation concerning our plans, objectives, expectations and assumptions other than statements involving historical facts, are forward-looking statements. Such forward-looking statements include forecast financial information. Such forward-looking statements regarding revenues, earnings, performance, strategies, prospects, expenses and other aspects of our businesses are based on current expectations, which are subject to risks and uncertainties, and based on forecast electricity prices, the current government tariff, and/or commercial agreements pertaining to each project and the current or expected licenses and permits of each project. In addition, the details regarding projects included in this presentation, that are under advanced development or early-stage development, are based on current internal assessments of our management, and there is no certainty or assurance that we will be able to develop or complete those projects, as the development of such projects requires, among other things, approvals, land rights, permits and financing (equity, project financing and capital which will be raised through debt and equity issuances, and through disposal of assets). The use of certain words, including the words "assessment", "project", "intends", "expects", "plans", "believes", "will" and similar expressions are aimed at identifying forward-looking statements as defined in the Private Securities Litigation Reform Act of 1995 and the Israeli Securities Law, 1968. The Company may not actually achieve the plans, intentions or expectations included in our forward-looking statements, and one should not place undue reliance on these forward-looking statements. Various important factors could cause actual results or events to differ materially from those which may be expressed or implied by our forward-looking statements, including changes in electricity prices and demand, regulatory changes, inability to obtain the financing required for the development and construction of projects, continuation of the war and hostilities in Israel, Gaza and Lebanon and between Israel and Iran, increases in interest rates and inflation, changes in exchange rates, in the availability and prices of resources required for the operation of the Company's facilities (such as waste and natural gas) and in the price of oil, the impact of continued military conflict between Russia and Ukraine, delays in development, construction, or commencement of operation of the projects under development and construction, technical and other disruptions in the operations or construction of the facilities owned by the Company, failure to obtain permits - whether within the set timeframe or at all, climate change, and general market, political and economic conditions in the countries in which the Company operates, including Israel, Spain, Italy and the United States. These and other risks and uncertainties associated with our business are described in greater detail in the filings we make from time to time with SEC, including our Annual Report on Form 20-F. The forward-looking statements are made as of that date and we do not undertake any obligation to revise any forward-looking statements, whether due to new information, future events or otherwise. Projections are calculated based on an NIS/EUR exchange rate of approximately 3.6.

Use of non-IFRS measures - This presentation includes actual and forecast EBITDA and FFO, which are non-IFRS measures. EBITDA is defined as income before net finance expenses, taxes, depreciation and amortization, and FFO (funds from operations) is calculated by adding taxes and finance expenses to the EBITDA. Although the Company views the non-IFRS measures as important measures of comparative operational performance, these non-IFRS measures should not be viewed in isolation or as a substitute for net income or other statement of income or cash flow data prepared in accordance with IFRS as a measure of profitability or liquidity. These non-IFRS measures do not take into consideration our obligations, including capital expenditure and restricted cash, and therefore are not necessarily indicative of amounts that may be available for discretionary use. In addition, FFO does not represent and is not an alternative to operating cash flow as defined in IFRS, and is not an indication of cash available to fund all cash flow needs, including the ability to make distributions. Not all companies calculate EBITDA or FFO in the same manner, and the presented measures may not be comparable to similarly-titled measures presented by other companies. The Company uses these measures internally as performance indicators, and believes that when these measures are combined with IFRS measures they add useful information regarding the Company's operational performance. The Company is unable to provide a reconciliation between projected EBITDA, FFO and the net income or loss on a forward-looking basis without unreasonable efforts, as items that affect these financial measures, which are non-IFRS, are not under the Company's control and/or may not be reasonably predicted. These items include, among others, exchange rate differences, depreciation and amortization, other income, finance income, finance expenses and taxes on income. Such items may have a significant impact on the future financial results of the Company, and the Company believes that such a reconciliation for the projected results will not be meaningful.

Key Developments in the First Half of 2026

Creating Sources for Growth Acceleration

Sale of Dorad Holdings

NIS 742.5M

Total consideration

16.9%

Stake sold

The transaction was completed at an implied Dorad valuation of approximately NIS 4.4 billion, reflecting significant value creation.

Net proceeds received after debt deduction at the holding company level amounted to approximately NIS 560 million

Italy | FER X tender award

100MW

2 projects

20

Years of guaranteed tariff

67.7 €/MWh

Weighted tariff (before indexation)

Two projects awarded tariffs under Italy's FER X tender, guaranteed tariff for 20 years.

Storage (BESS)

1.2GWh

BESS projects under development

0.6GWh

Ready to Build (RTB) projects in advanced stages of acquisition

The company is accelerating its move into energy storage (BESS) as part of its strategic plan by developing BESS projects alongside its existing Solar assets and entering the stand-alone storage market

Project Progress

1,872MWh

Manara pumped storage

Work resumed at an accelerated pace

174MW

Expected grid connection in 2026

24MW

Construction of two new Solar projects in the U.S. began in June 2026

227MW

Pre-construction projects

Operating Footprint

4

Technologies

- Solar
- BESS (Battery Storage)
- Biogas
- Pumped Storage

5

- **49MW** – U.S. | Solar

1. The company's share in the 300MW Talasol project is 51%.

2. The company's share is 51%.

Sale of Dorad Holdings

Sale of the **16.9%** stake in Dorad at an implied valuation of NIS **4.4** billion

Strategic Benefits

Stronger Balance Sheet & Liquidity

Increasing the company's cash balances and improving its financial profile

Focus on Core Business

Strategic focus on the renewable energy sector, maximizing return potential through control over the development, construction, financing, and operations

Proven Value Creation

The Dorad transaction demonstrates the company's ability to identify assets at an early stage, enhance their value, and realize a significant gain at the right time

* After deducting 50% of the net debt of the holding company, "Ellomay Luzon Energy Infrastructures".

Use of Proceeds from the Dorad Sale

The proceeds are expected to strengthen the balance sheet and support the acceleration of the company's growth drivers

Balance Sheet Strengthening

- 60% of net proceeds
- Significant deleveraging
- Increasing cash balances
- Improving the credit rating

Growth Drivers

- 40% of the proceeds
- Equity for new projects
- Expansion of energy storage operations
- Advancing the development pipeline in Israel and abroad

Growth Drivers in Energy Storage

Stand-Alone Projects

Creating stable, long-term cash flow through agreements with leading offtakers in the market

Storage Integration

Reducing exposure to power price volatility and increasing revenues, while enabling the company to enter into Hybrid PPAs at significantly higher prices than solar projects without storage

Projects Grid Connection Forecast

Connected Projects Forecast

Existing Projects Pipeline

The graph is based on projects currently under development and construction. The company may decide to sell some of the project as a full or partial alternative to financing its development efforts through equity/debt issuances.
* The Company's storage pipeline includes 1,872 MWh from the pumped-storage project and 1,878 MWh from its BESS projects.

Company-Level Forecasts (Consolidated) | € millions

Significant value creation in 2026 following the Dorad sale

Revenues**

EBITDA *

* Loss for the year ended December 31, 2025 was approximately € 6 million.

** Revenues include revenues from disposition of assets and income due to the sale of tax credits (ITC) in the USA.

*** Includes other income from the disposition of Dorad in the amount of approximately 90 million euros.

The projections do not include projects under development. The projections are presented on a consolidated basis (100%).

EBITDA is a non-IFRS measures. The Company is unable to provide a reconciliation between the EBITDA and the net income / loss on a forward-looking basis without unreasonable efforts, as items that affect this financial measure, which are non-IFRS, are not under the Company's control and/or may not be reasonably predicted. See Slide 2 and also see slide 34 for a reconciliation of 2025 net loss to EBITDA.

Project-Level Forecasts | € millions

Significant growth as the project pipeline matures

Revenues*

EBITDA

* Revenues include income due to the sale of tax credits (ITC) in the USA.

The projections do not include projects under development. The projections are presented on a consolidated basis (100%).

EBITDA is a non-IFRS measure. The Company is unable to provide a reconciliation between the EBITDA and the net income / loss on a forward-looking basis without unreasonable efforts, as items that affect this financial measure, which are non-IFRS, are not under the Company's control and/or may not be reasonably predicted.

EBITDA and FFO are non-IFRS measures. The Company is unable to provide a reconciliation between the EBITDA and FFO and the net income / loss on a forward-looking basis without unreasonable efforts, since items that affect these financial measures, which are non-IFRS, are not under the Company's control and/or may not be reasonably predicted. See Slide 2.
The figures reflect a representative operating year and are presented based on full ownership (100%).

Use of non-IFRS financial measures

The company defines financial debt as loans plus bonds classified as current liabilities, plus finance lease liabilities, plus long-term bank loans, plus bonds classified as non-current liabilities. Net financial debt is defined as financial debt less cash and cash equivalents, less investments held for trading, and less short-term deposits. CAP is defined as equity plus financial debt. The company presents these metrics to provide additional insight into its leverage and debt ratios.

Although the company considers these metrics important indicators of leverage, they should not be viewed in isolation or as a substitute for long-term loans or other balance sheet data prepared in accordance with IFRS. Other companies may calculate these metrics differently, and therefore the figures presented may not be comparable to similarly titled figures reported by other companies.

Appendix B | Reconciliation of loss to EBITDA (in € millions)

	2025
Loss for the year ended December 31, 2025	(6)
Financing expenses, net	27
Tax Benefit	(2)
Depreciation and amortization expenses	16
EBITDA	35
