1. 7.77% GATOR CAPITAL MANAGEMENT
2. 5.59% Vanguard®
3. 4.88% Perritt CAPITAL MANAGEMENT

Frank Holmes CEO and CIO owns approximately **19%** of the company and has approximately **99%** of voting control.

Strategy and Tactics

1. Create thematic products that are sustainable using a smart beta 2.0 strategy. Requires rigorous back testing for 1,000s of hours.
2. Our mission is to make people feel financially happy and secure that their wealth is consistently growing.
3. Strategically buy back stock using an algorithm on flat and down days.
4. Manage and preserve cash for future growth opportunities and market corrections.
5. M&A activity to acquire fund assets.
6. Grow our subscriber base and followers.
7. Increase our exposure to Bitcoin Ecosystem.

Why We Buy Back Our Stock

The Company ***believes its stock is undervalued*** and therefore buys back shares of GROW when the price is **flat or down from the previous trading day using an algorithm.**

This is part of the Company's **two-pillar** strategy to enhance shareholder value by paying the dividend as well as the buyback amount per year.

Current Share Repurchase Program

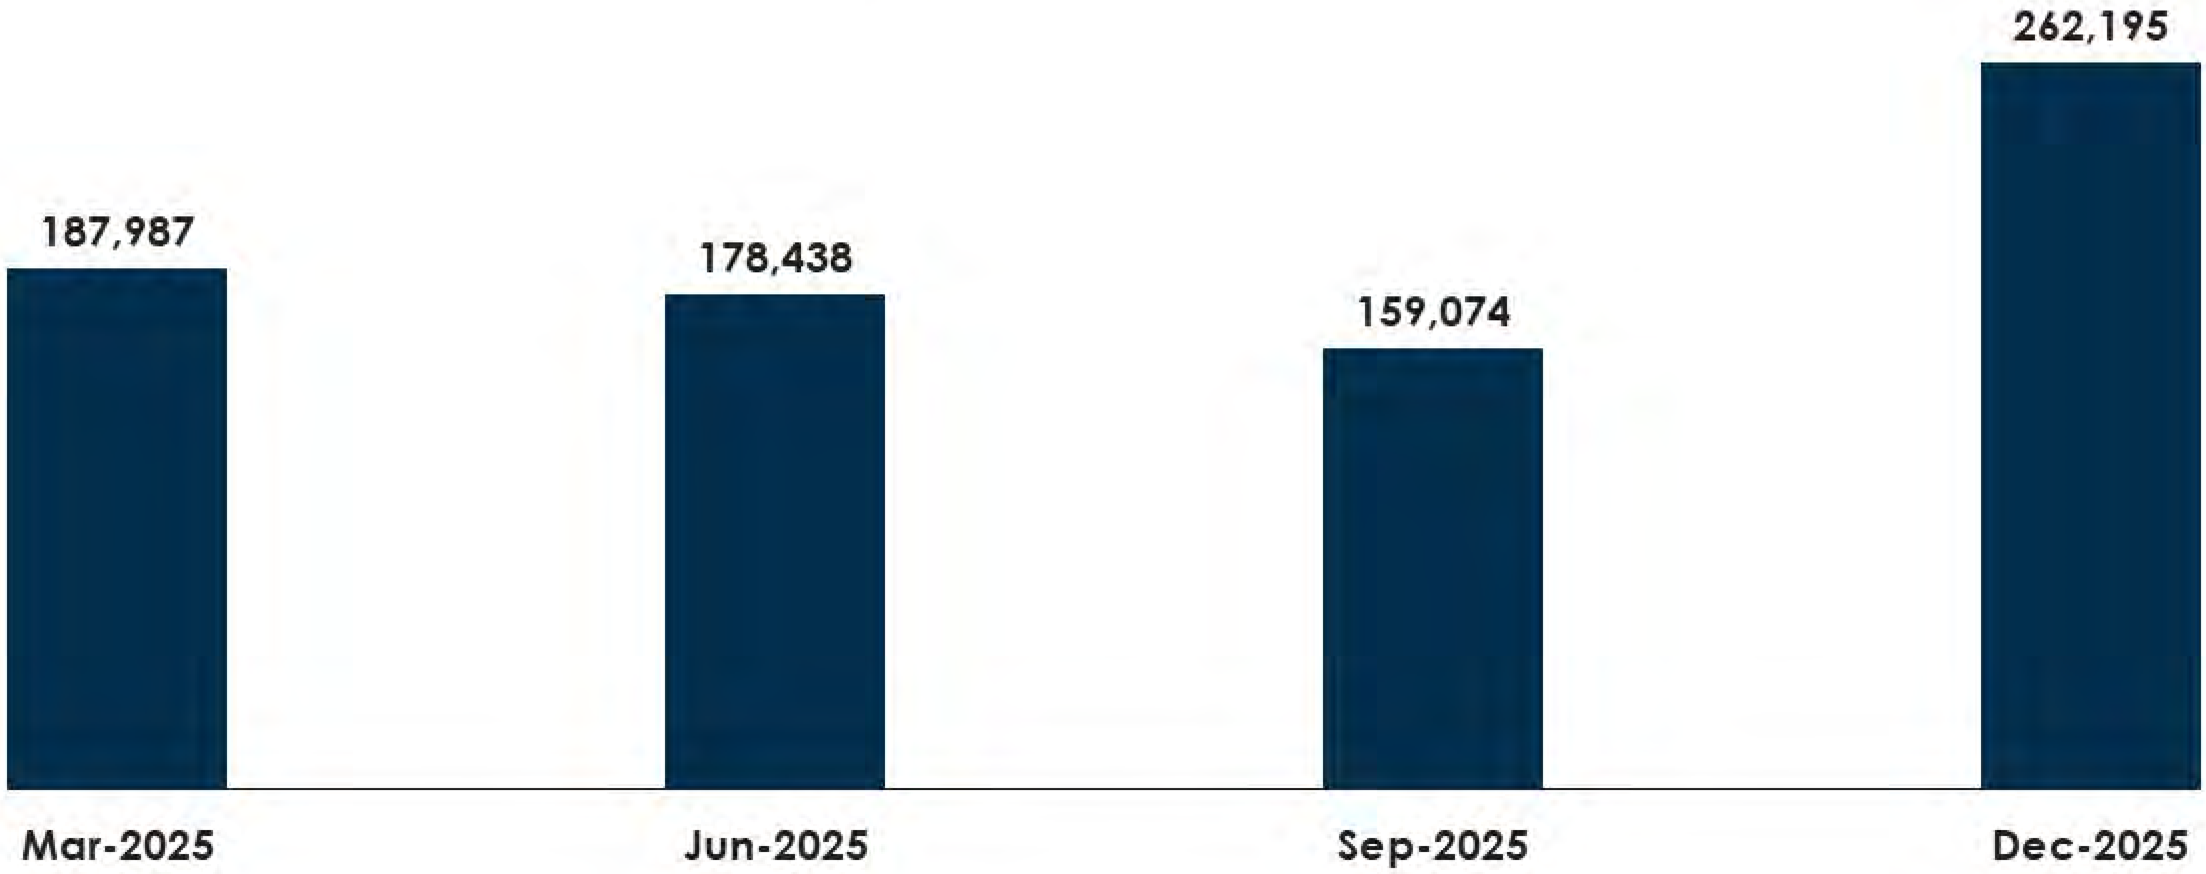
For the three months ended December 31, 2025, the Company repurchased a total of ***262,195*** class A shares using cash of approximately ***$664,000***.

Over past 18 months we have shrunk the shares outstanding by approximately 10%.

May be suspended or discontinued as deemed necessary.

GROW Buyback Recap

Quarterly Repurchases Through December 2025



$$\boxed{\textbf{Shareholder Yield} =} \ \frac{\text{Dividends} + \text{Buybacks} + \text{Debt Reduction}}{\text{Market Capitalization}}$$

GROW Dividends

The Company has paid a monthly dividend since

June 2007

Current yield at a share price of **$3.17** as of 02/19/2026.

2.84%

Monthly dividend payment of **$0.0075**

Approved through March 2026.

A Look At Q2 2026

GROW Strengths

1. The company has steady cashflow, despite a volatile and challenging macro market environment.

2. The company has a strong balance sheet which includes both cash and other investments.

3. The company continues to buy back stock on flat or down days and pay a monthly dividend.

Smart Beta 2.0 Investing

Our **Quantamental Investment Strategy** combines cutting edge technology with robust data analysis to help optimize returns and manage risk effectively for our shareholders.

We believe the use of **Smart Beta 2.0** factors in our thematic fund lineup sets us apart from the competition.

Quant approach, back tested **1000's of hours** over decades of data to determine optimized portfolio construction and stock factors to rebalance every quarter.

Disclosures

All opinions expressed and data provided are subject to change without notice. Some of these opinions may not be appropriate to every investor.

The NYSE Arca Gold BUGS (Basket of Unhedged Gold Stocks) Index (HUI) is a modified equal dollar weighted index of companies involved in gold mining. The HUI Index was designed to provide significant exposure to near term movements in gold prices by including companies that do not hedge their gold production beyond 1.5 years.

The S&P 500 Stock Index is a widely recognized capitalization-weighted index of 500 common stock prices in U.S. companies. The Russell 2000 Index is a small-cap stock market index of the bottom 2,000 stocks in the Russell 3000 Index. The U.S. Trade Weighted Dollar Index provides a general indication of the international value of the U.S. dollar.

The S&P Global Natural Resources Index includes 90 of the largest publicly-traded companies in natural resources and commodities businesses that meet specific investibility requirements, offering investors diversified, liquid and investable equity exposure across 3 primary commodity-related sectors: Agribusiness, Energy, and Metals & Mining.

Standard deviation is a measure of the dispersion of a set of data from its mean. The more spread apart the data, the higher the deviation. Standard deviation is also known as historical volatility.

The Consumer Price Index (CPI) is one of the most widely recognized price measures for tracking the price of a market basket of goods and services purchased by individuals. The weights of components are based on consumer spending patterns.

Cash Flow is a measure of the amount of cash generated by a company's normal business operations.

There is no guarantee that the issuers of any securities will declare dividends in the future or that, if declared, will remain at current levels or increase over time. Note that stocks and Treasury bonds differ in investment objectives, costs and expenses, liquidity, safety, guarantees or insurance, fluctuation of principal or return, and tax features.

Frank Holmes has been appointed non-executive chairman of the Board of Directors of HIVE Digital Technologies. Both Mr. Holmes and U.S. Global Investors own shares of HIVE. Effective 8/31/2018, Frank Holmes serves as the interim executive chairman of HIVE.

Disclosures

Please consider carefully a fund's investment objectives, risks, charges and expenses. For this and other important information, obtain a statutory and summary prospectus for JETS, GOAU and SEA by visiting www.usglobaletfs.com. Read it carefully before investing.

Distributed by Quasar Distributors, LLC. U.S. Global Investors is the investment adviser to JETS, GOA, SEA and WAR.

Investing involves risk, including the possible loss of principal. Shares of any ETF are bought and sold at market price (not NAV), may trade at a discount or premium to NAV and are not individually redeemed from the funds. Brokerage commissions will reduce returns. Because the funds concentrate their investments in specific industries, the funds may be subject to greater risks and fluctuations than a portfolio representing a broader range of industries. The funds are non-diversified, meaning they may concentrate more of their assets in a smaller number of issuers than diversified funds. The funds invest in foreign securities which involve greater volatility and political, economic and currency risks and differences in accounting methods. These risks are greater for investments in emerging markets. The funds may invest in the securities of smaller-capitalization companies, which may be more volatile than funds that invest in larger, more established companies. The performance of the funds may diverge from that of the index. Because the funds may employ a representative sampling strategy and may also invest in securities that are not included in the index, the funds may experience tracking error to a greater extent than funds that seek to replicate an index. The funds are not actively managed and may be affected by a general decline in market segments related to the index.

Airline Companies may be adversely affected by a downturn in economic conditions that can result in decreased demand for air travel and may also be significantly affected by changes in fuel prices, labor relations and insurance costs. Gold, precious metals, and precious minerals funds may be susceptible to adverse economic, political or regulatory developments due to concentrating in a single theme. The prices of gold, precious metals, and precious minerals are subject to substantial price fluctuations over short periods of time and may be affected by unpredicted international monetary and political policies. We suggest investing no more than 5% to 10% of your portfolio in these sectors.

Foreign and emerging market investing involves special risks such as currency fluctuation and less public disclosure, as well as economic and political risk. By investing in a specific geographic region, such as China and/or Taiwan, a regional ETFs returns and share price may be more volatile than those of a less concentrated portfolio.

Cargo Companies may be adversely affected by downturn in economic conditions that can result in decreased demand for sea shipping and freight.

Disclosures

Performance data quoted above is historical. Past performance is no guarantee of future results. Results reflect the reinvestment of dividends and other earnings. For a portion of periods, the fund had expense limitations, without which returns would have been lower. Current performance may be higher or lower than the performance data quoted. The principal value and investment return of an investment will fluctuate so that your shares, when redeemed, may be worth more or less than their original cost. Performance does not include the effect of any direct fees described in the fund's prospectus which, if applicable, would lower your total returns. Performance quoted for periods of one year or less is cumulative and not annualized. Obtain performance data current to the most recent month-end at www.usfunds.com or 1-800-US-FUNDS.

Shares of any ETF are bought and sold at market price (not NAV), may trade at a discount or premium to NAV and are not individually redeemed from the funds. Brokerage commissions will reduce returns. Stock markets can be volatile and share prices can fluctuate in response to sector-related and other risks as described in the fund prospectus. All opinions expressed and data provided are subject to change without notice. Some of these opinions may not be appropriate to every investor.

Smart beta 2.0 combines the benefits of passive investing and the advantages of active investing strategies.
