Growth & Asset Quality

Loan Delinquency (% of total loans)

*The increase in loan delinquency was the result of a single commercial real estate loan originated for the acquisition and renovation of an operating apartment complex. Construction delays pushed the loan past its maturity date, triggering its classification as nonperforming; however, the underlying asset remains fundamentally sound, with a 94.3% occupancy rate and improving rent levels. Management established a reserve for this loan in Q1 2026 and does not anticipate additional provision going forward.
