NERDWALLET REPORTS FIRST QUARTER 2025 RESULTS
Revenue of $209.2 million, Up 29% Year-Over-Year

FINANCIAL HIGHLIGHTS

- Revenue of $209.2 million
- GAAP income from operations of $0.7 million
- GAAP net income of $0.2 million or $0.00 income per diluted share
- Non-GAAP operating income of $9.3 million
- Adjusted EBITDA of $21.1 million

SAN FRANCISCO, CA—May 6, 2025—NerdWallet, Inc. (Nasdaq: NRDS), which provides trustworthy financial guidance to consumers and small and mid-sized businesses (SMBs), today reported financial results for its first quarter ended March 31, 2025.

“In Q1, we grew revenue 29% year-over-year to $209 million, led by the strength in our Insurance and banking businesses,” said Tim Chen, Co-Founder and Chief Executive Officer of NerdWallet. “We also saw encouraging signs in mortgages, supported by our acquisition of Next Door Lending, and personal loans. We remain focused on our long-term growth by improving our operational efficiency and investing in vertical integration and user engagement.”

FIRST QUARTER 2025 HIGHLIGHTS

As previously announced, effective with the fourth quarter of 2024, we present Insurance (previously included in Emerging verticals) as a separate revenue product category. Comparative amounts have been reclassified to conform to the presentation for the three months ended March 31, 2025.

- Insurance revenue of $74.0 million increased 246% year-over-year, driven by strong growth in auto insurance products as carriers expanded budgets.
- Credit cards revenue of $38.0 million decreased 24% year-over-year, primarily due to continued headwinds in organic search traffic that have persisted for multiple quarters.
- SMB products revenue of $28.9 million was down 5% year-over-year, primarily due to a decrease in business loan originations.
- Loans revenue of $24.0 million was up 12% year-over-year, primarily due to increases both in mortgage loans as we incorporated our recent acquisition of Next Door Lending and in personal loans.
- Emerging verticals revenue of $44.3 million was up 15% year-over-year, primarily driven by growth in banking products.

NON-GAAP FINANCIAL MEASURES

We use non-GAAP operating income (loss), adjusted EBITDA and adjusted free cash flow in conjunction with GAAP measures as part of our overall assessment of our performance, including the preparation of our annual operating budget and quarterly forecasts, to evaluate the effectiveness of our business strategies, and to communicate with our Board of Directors concerning our financial performance.

Non-GAAP operating income (loss): We define non-GAAP operating income (loss) as income (loss) from operations adjusted to exclude depreciation and amortization, and further exclude (1) impairment of right-of-use asset, (2) losses (gains) on disposals of assets, (3) change in fair value of contingent consideration related to earnouts, (4) deferred compensation related to earnouts, (5) acquisition-related costs, and (6) restructuring charges. We also reduce income from operations, or increase loss from operations, for capitalized internally developed software costs.

Adjusted EBITDA: We define adjusted EBITDA as net income (loss) from continuing operations adjusted to exclude depreciation and amortization, interest income (expense), net, other gains (losses), net, and provision (benefit) for income taxes, and further exclude (1) impairment of right-of-use asset, (2) losses (gains) on disposals of assets, (3) change in fair value of contingent consideration related to earnouts, (4) deferred compensation related to earnouts, (5) stock-based compensation, (6) acquisition-related costs, and (7) restructuring charges.

The above items are excluded from our non-GAAP operating income (loss) and adjusted EBITDA measures because these items are non-cash in nature, or because the amounts are not driven by core operating results and renders comparisons with prior periods less meaningful. We deduct capitalized internally developed software costs in our non-GAAP operating income (loss) measure to reflect the cash impact of personnel costs incurred within the time period.

We believe that non-GAAP operating income (loss) and adjusted EBITDA provide useful information to investors and others in understanding and evaluating our operating results and in comparing operating results across periods. Moreover, non-GAAP operating income (loss) and adjusted EBITDA are key measurements used by our management internally to make operating decisions, including those related to analyzing operating expenses, evaluating performance, and performing strategic planning and annual budgeting. However, the use of these non-GAAP measures have certain limitations because they do not reflect all items of income and expense that affect our operations. Non-GAAP operating income (loss) and adjusted EBITDA have limitations as financial measures, should be considered as supplemental in nature, and are not meant as substitutes for the related financial information prepared in accordance with GAAP. These limitations include the following:

- Non-GAAP operating income (loss) and adjusted EBITDA exclude certain recurring, non-cash charges, such as amortization of software, depreciation of property and equipment, amortization of intangible assets, impairment of right-of-use asset, and (losses) gains on disposals of assets. Although these are non-cash charges, the assets being depreciated and amortized may have to be replaced in the future, and non-GAAP operating income (loss) and adjusted EBITDA do not reflect all cash requirements for such replacements or for new capital expenditure requirements;
- Non-GAAP operating income (loss) and adjusted EBITDA exclude acquisition-related costs, including acquisition-related retention compensation under compensatory retention agreements with certain key employees, acquisition-related transaction expenses, contingent consideration fair value adjustments related to earnouts, and deferred compensation related to earnouts;
- Non-GAAP operating income (loss) and adjusted EBITDA exclude restructuring charges primarily consisting of severance payments, stock-based compensation, employee benefits, and related expenses for impacted employees, as well as contract termination costs, associated with our Restructuring Plan;
- Adjusted EBITDA excludes stock-based compensation, including for acquisition-related inducement awards, which has been, and will continue to be for the foreseeable future, a significant recurring expense in our business and an important part of our compensation strategy; and
- Adjusted EBITDA does not reflect interest income (expense) and other gains (losses), net, which include unrealized and realized gains and losses on foreign currency exchange, as well as certain nonrecurring gains (losses).

Adjusted free cash flow: We previously defined free cash flow as net cash provided by operating activities less capitalized software development costs and purchases of property and equipment. Effective with the first quarter of 2025, we further define our adjusted free cash flow to be free cash flow adjusted for any net borrowing or repayment on our warehouse line of credit which is used to fund mortgage loans originated for sale, as any increase or decrease in our mortgage loans held for sale is substantially offset by a corresponding borrowing or repayment on our warehouse line of credit. Adjusted free cash flow is a key measurement used by our management internally to evaluate our business performance and overall liquidity. We believe that adjusted free cash flow provides useful information for investors and others for determining the amount of cash available for investment in our business, strategic opportunities, repurchasing stock, strengthening our financial position and other purposes, as well as evaluating our historical and prospective liquidity. A limitation of the utility of adjusted free cash flow as a measure of financial performance and liquidity is that adjusted free cash flow does not represent the total increase or decrease in our cash balance for the period.

In addition, non-GAAP operating income (loss), adjusted EBITDA and adjusted free cash flow as we define them may not be comparable to similarly titled measures used by other companies. Because of these limitations, you should consider non-GAAP operating income (loss), adjusted EBITDA and adjusted free cash flow alongside other financial performance measures, including income (loss) from operations, net income (loss), cash flows from operating activities and our other GAAP results.

We compensate for these limitations by reconciling non-GAAP operating income (loss) to income (loss) from operations, adjusted EBITDA to net income (loss) and adjusted free cash flow to net cash provided by operating activities, the most directly comparable GAAP financial measures, as follows:

FINANCIAL OUTLOOK

We are providing guidance for the second quarter of 2025:

- Revenue is expected in the range of $192-$200 million, up 30% year-over-year at the midpoint
- GAAP operating income is expected in the range of $6-$10 million
- Non-GAAP operating income is expected in the range of $14-$18 million
- Adjusted EBITDA is expected in the range of $29-$33 million

We are increasing our forecasted 2025 annual GAAP operating income to a range of $25-$38 million, and forecasted non-GAAP operating income to a range of $55-$66 million. We are also increasing our forecasted 2025 annual adjusted EBITDA to a range of $108-$119 million.

NerdWallet has not provided a quantitative reconciliation of forecasted GAAP net income (loss) to forecasted adjusted EBITDA within this communication because the Company is unable, without making unreasonable efforts, to calculate certain reconciling items with confidence. These items include, but are not limited to, income taxes which are directly impacted by unpredictable fluctuations in the market price of the Company's capital stock. These items, which could materially affect the computation of forward-looking GAAP net income (loss), are inherently uncertain and depend on various factors, many of which are outside of NerdWallet's control.

A reconciliation of forecasted GAAP operating income to forecasted non-GAAP operating income for forecasted second quarter 2025 and forecasted full year 2025 is as follows:

(in millions)	Forecasted Second Quarter 2025	Forecasted Full Year 2025
GAAP operating income	$6 - $10	$25 - $38
Estimated adjustments for:		
Depreciation and amortization	12 - 13	47 - 51
Acquisition-related retention	1	2
Restructuring	—	0 - 1
Capitalized internally developed software costs	(5) - (6)	(21) - (24)
Non-GAAP operating income	**$14 - $18**	**$55 - $66**

For more information regarding the non-GAAP financial measures discussed in this communication, please see "Non-GAAP Financial Measures" above.
