Third Quarter 2026 Results

October 29, 2026

Notes to Investors

- **Forward-Looking Statements**

  The information in this presentation has been prepared as at October 28, 2026. Certain statements contained in this presentation constitute "forward-looking statements" within the meaning of the United States Private Securities Litigation Reform Act of 1995 and "forward-looking information" under the provisions of Canadian provincial securities laws and are referred to herein as "forward-looking statements". All statements, other than statements of historical fact, that address circumstances, events, activities or developments that could, or may or will occur are forward-looking statements. When used in this presentation, the words "achieve", "aim", "anticipate", "commit", "could", "envisions", "estimate", "expect", "forecast", "future", "guide", "objective", "plan", "potential", "schedule", "target", "track", "will", and similar expressions are intended to identify forward-looking statements. Such statements include the Company's forward-looking guidance, including metal production, estimated ore grades, recovery rates, project timelines, drilling targets or results, life of mine estimates, total cash costs per ounce, AISC per ounce, other expenses and cash flows; the potential for additional gold production at the Company's sites, including the potential to increase annual gold production by 20% to 30% over the next decade, exceeding four million ounces by the 2030s; the estimated timing and conclusions of the Company's studies and evaluations; the methods by which ore will be extracted or processed; the Company's plans at Detour Lake underground, Upper Beaver, Odyssey, Hope Bay and San Nicolás, including the approval, timing, funding, completion and commissioning thereof and various projects at such sites and the commencement of production therefrom; statements concerning the Company's "fill-the-mill" strategy at Canadian Malartic; statements regarding the rock mass movement at the Barnat open pit's effect on production; statements regarding the remediation plan and redesign at the Barnat open pit; statements regarding the effect of the rock mass movement on the development or production outlook at the Odyssey mine or change to the Company's pathway to increase annual production at Canadian Malartic; statements concerning other expansion projects, recovery rates, mill throughput, optimization efforts and projected exploration, including costs and other estimates upon which such projections are based; timing and amounts of capital expenditures, other expenditures and other cash needs, and expectations as to the funding thereof; estimates of future mineral reserves, mineral resources, the expected conversion of mineral resources to mineral reserves, mineral production and sales; the projected development of certain ore deposits, including estimates of exploration, development, production, closure and other capital expenditures and estimates of the timing of such exploration, development, production and closure or decisions with respect to such exploration, development, production and closure; estimates of mineral reserves and mineral resources and the effect of drill results and studies on future mineral reserves and mineral resources; the Company's ability to obtain the necessary permits and authorizations in connection with its proposed or current exploration, development and mining operations, and the anticipated timing or submission or receipt thereof; future exploration; the anticipated timing of events with respect to the Company's mine sites; the Company's plans and strategies with respect to sustainability initiatives; the sufficiency of the Company's cash resources; the Company's plans with respect to hedging and the effectiveness of its hedging strategies and the economic impact thereof; future dividend amounts, record dates and payment dates, including the Company's anticipated return of more than 50% of free cash flow to shareholders through dividends and share repurchases in 2026; plans with respect to activity under the NCIB; the effect of tariffs, trade restrictions and the effect of geopolitical events on the Company, whether through availability of inputs or inflation; and anticipated trends with respect to the Company's operations, exploration and the funding thereof. Such statements reflect the Company's views as at the date of this presentation and are subject to certain risks, uncertainties and assumptions, and undue reliance should not be placed on such statements. Forward-looking statements are necessarily based upon a number of factors and assumptions that, while considered reasonable by Agnico Eagle as of the date of such statements, are inherently subject to significant business, economic and competitive uncertainties and contingencies. The material factors and assumptions used in the preparation of the forward-looking statements contained herein, which may prove to be incorrect, include, but are not limited to, the assumptions set forth herein and in management's discussion and analysis for the year ended December 31, 2025 (the "2025 MD&A") and the Company's Annual Information Form (the "AIF") for the year ended December 31, 2025 filed with Canadian securities regulators and that are included in its Annual Report on Form 40-F for the year ended December 31, 2025 (the "Form 40-F") filed with the U.S. Securities and Exchange Commission (the "SEC") as well as: that there are no significant disruptions affecting operations; that production, permitting, development, expansion and the ramp-up of operations at each of Agnico Eagle's properties proceeds on a basis consistent with current expectations and plans; that the Company's plans for its mining operations are not changed or amended in a material way; that the relevant metal prices, foreign exchange rates and prices for key mining and construction inputs (including labour and electricity) will be consistent with Agnico Eagle's expectations; that the effect of tariffs or trade disputes will not materially affect the price or availability of the inputs the Company uses at its operations; that Agnico Eagle's current estimates of mineral reserves, mineral resources, mineral grades and metal recovery are accurate; that there are no material delays in the timing for completion of ongoing growth projects; that seismic activity at the Company's operations at LaRonde, Goldex, Fosterville and other properties is as expected by the Company and that the Company's efforts to mitigate its effect on mining operations, including with respect to community relations, are successful; that the Company's current plans to address climate change and reduce greenhouse gas emissions are successful; that the Company's current plans to optimize production are successful; that there are no material variations in the current tax and regulatory environment; that governments, the Company or others do not take measures in response to pandemics or other health emergencies or otherwise that, individually or in the aggregate, materially affect the Company's ability to operate its business or its productivity; and that measures taken relating to, or other effects of, pandemics or other health emergencies do not affect the Company's ability to obtain necessary supplies and deliver them to its mine sites. Many factors, known and unknown, could cause the actual results to be materially different from those expressed or implied by such forward-looking statements. Such risks include, but are not limited to: the volatility of prices of gold and other metals; uncertainty of mineral reserves, mineral resources, mineral grades and mineral recovery estimates; uncertainty of future production, project development, capital expenditures and other costs; foreign exchange rate fluctuations; inflationary pressures; financing of additional capital requirements; cost of exploration and development programs; seismic activity at the Company's operations, including at LaRonde, Goldex and Fosterville; mining risks; community protests, including by Indigenous groups; risks associated with foreign operations; risks associated with joint ventures; governmental and environmental regulation; the volatility of the Company's stock price; risks associated with the Company's currency, fuel and by-product metal derivative strategies; the current interest rate environment; the potential for major economies to encounter a slowdown in economic activity or a recession; the potential for increased conflict or hostilities in various regions, including Europe, South America and the Middle East; and the extent and manner of communicable diseases or outbreaks, and measures taken by governments, the Company or others to attempt to mitigate the spread thereof may directly or indirectly affect the Company. For a more detailed discussion of such risks and other factors that may affect the Company's ability to achieve the expectations set forth in the forward-looking statements contained in this presentation, see the AIF and 2025 MD&A filed on SEDAR+ at www.sedarplus.ca and included in the Form 40-F filed on EDGAR at www.sec.gov, as well as the Company's other filings with the Canadian securities regulators and the SEC. Other than as required by law, the Company does not intend, and does not assume any obligation, to update these forward-looking statements.

- **About this Presentation**

  Unless otherwise stated, references to "Canadian Malartic", "Goldex", "LaRonde" and "Meadowbank" are to the Company's operations at the Canadian Malartic complex, the Goldex complex, the LaRonde complex and the Meadowbank complex, respectively. The Canadian Malartic complex consists of the mining, milling and processing operations at the Canadian Malartic mine and the mining operations at the Odyssey mine. The Goldex complex consists of the mining, milling and processing operations at the Goldex mine and the mining operations at the Akasaba West open pit mine. The LaRonde complex consists of the mining, milling and processing operations at the LaRonde mine and the mining operations at the LaRonde Zone 5 mine. The Meadowbank complex consists of the milling and processing operations at the Meadowbank mine and the mining operations at the Amaruq open pit and underground mines. References to other operations are to the relevant mines, projects or properties, as applicable.

- **Further Information –** For further details on Agnico Eagle's third quarter 2026 results, see the Company's news release dated October 28, 2026.

- **Note Regarding Currency** – All amounts expressed in U.S. dollars unless otherwise noted.

- **Front Cover** – Agnico Eagle's Macassa operations located in the Kirkland Lake region in northeastern Ontario, taken in the third quarter of 2026.

Q3 2026 Highlights – High-Quality, Consistent, Resilient Business

AGNICO EAGLE

1 Solid Production and Cost Control Drive Strong Financial Results

- Strong operational performance led by Detour Lake, Kittila and Fosterville
- Production remains towards low-end of guidance range for FY2026
- Continued focus on safe production and optimization initiatives

Detour Lake

2 Strong Free Cash Flow Supports Solid Shareholder Returns

- Free cash flow[1] of $852M driven by strong operational performance
- Shareholder returns of ~$478 million* or 56% of free cash flow
  - FY2026 returns now expected to exceed 50%

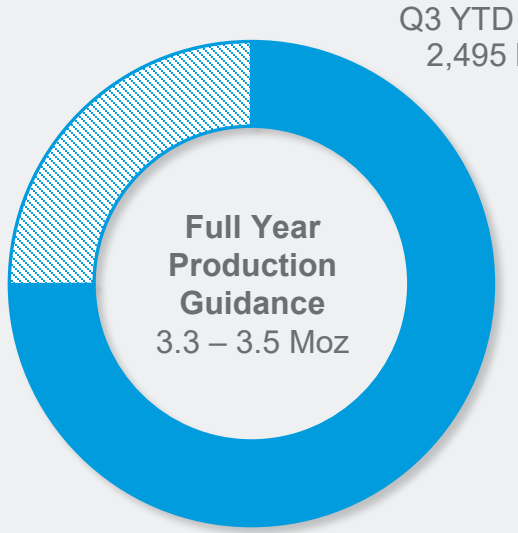

Canadian Malartic

3 Building the Foundations of Our Future Growth

- Advancing key value driver projects
- Exploration program yielding positive results, including at the Boston deposit at Hope Bay and Ikkari

Hope Bay

Production Remains Towards Low-End of 2026 Guidance Range

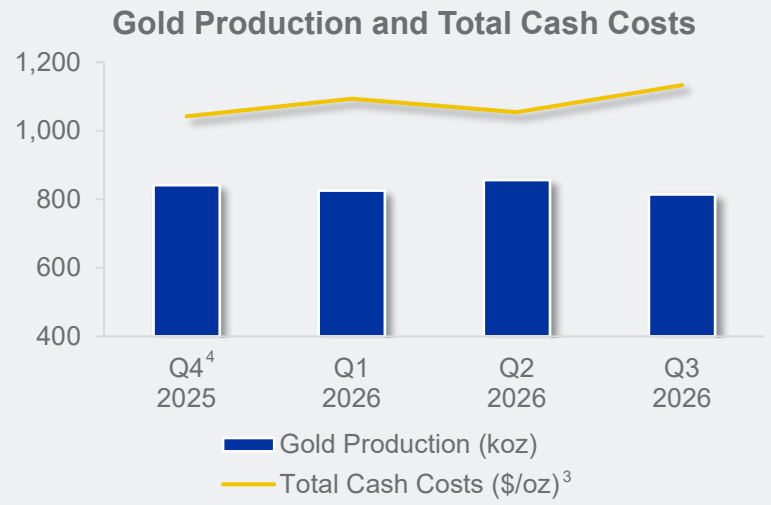

Full Year Guidance

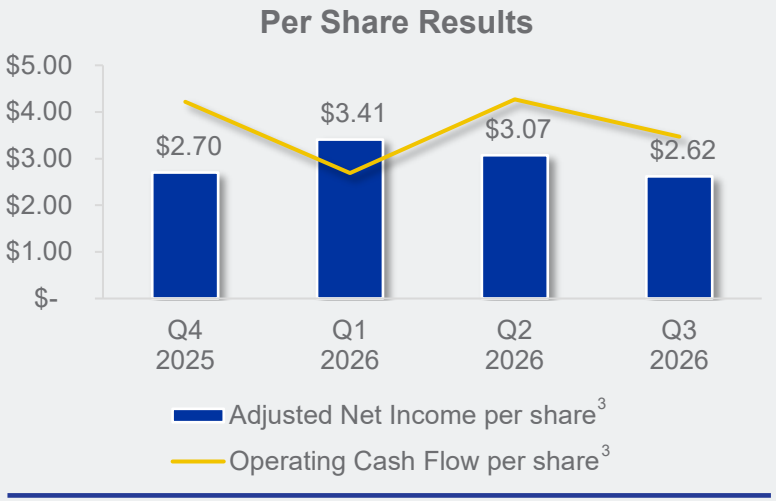

- Total Cash Costs[1] $1,020 - $1,120/oz
- AISC[1] $1,400 - $1,550/oz

* Through the dividend and NCIB
[1] These are non-GAAP measures, see Notes to Investors Regarding Certain Measures of Performance in this presentation
[2] Gold production excludes 1,415 and 249 ounces from La India and Creston Mascota, respectively, which were produced from residual leaching

Financial Highlights – Strong Free Cash Flow Reflects Continued Focus On Cost Discipline

	Q3 2026	Q3 2025	Q3 YTD 2026	Q3 YTD 2025
Realized Gold Price[1] ($/oz)	**$4,264**	$3,476	**$4,537**	$3,221
Gold Production[2] (koz)	**814**	867	**2,495**	2,607
Production Costs ($/oz)	**$1,193**	$963	**$1,155**	$918
Total Cash Costs[3,4] ($/oz)	**$1,133**	$952	**$1,092**	$924
AISC[3,4] ($/oz)	**$1,648**	$1,331	**$1,529**	$1,262
(in millions)				
Net Income	**$1,353**	$1,055	**$4,649**	$2,938
Adjusted Net Income[3]	**$1,324**	$1,085	**$4,571**	$2,831
Adjusted EBITDA[3]	**$2,466**	$2,098	**$8,214**	$5,602
Cash Provided by Operating Activities	**$1,755**	$1,816	**$5,245**	$4,706
Capital Expenditures[3,5]	**$921**	$644	**$2,296**	$1,601
Free Cash Flow[3]	**$852**	$1,190	**$2,919**	$3,089
(basic shares outstanding)				
Net Income per share	**$2.67**	$2.10	**$9.25**	$5.85
Adjusted Net Income per share[3]	**$2.62**	$2.16	**$9.09**	$5.64
Operating Cash Flow per share[3]	**$3.47**	$3.62	**$10.43**	$9.37

[1] Realized gold price is calculated as gold revenues from mining operations divided by the number of ounces sold
[2] For Q3 2026 excludes gold production at La India and Creston Mascota of 557 and 115 ounces, respectively, which were produced from residual leaching.
For Q3 YTD 2026 excludes gold production at La India and Creston Mascota of 1,415 and 249 ounces, respectively, which were produced from residual leaching
[3] These are non-GAAP measures, see Notes to Investors Regarding Certain Measures of Performance in the appendix
[4] Total cash costs per ounce and AISC per ounce for each period of 2025 have been restated using the Company's revised composition for periods commencing on or after January 1, 2026. Using the Company's composition of this measure for periods ending on or prior to December 31, 2025, total cash costs per ounce were $994, $943 and $1,089 for Q3, Q3 YTD and Q4 2025, respectively, and AISC per ounce were $1,373 and $1,281 for Q3 and Q3 YTD, respectively.
[5] Includes capitalized exploration

Disciplined Capital Allocation Strategy

1 Primary Capital Focus

- **Sustaining capital[1] –** $744M Q3 2026 YTD
- **Dividends –** $678M Q3 2026 YTD
- **Maintain strong balance sheet position and enhance financial flexibility**

2 Value Creation Investments

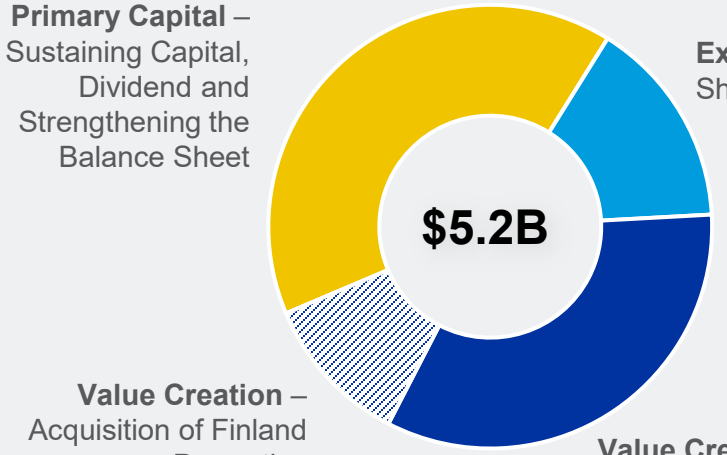

- **Re-investment in high-return growth projects –** Development capital[1] of $1,552M Q3 2026 YTD
- **Exploration program**
- **Strategic investment and M&A strategy**

3 Excess Capital Returns

- **Share buyback program** with internal purchase limit of $2B
- Shares repurchased – $800M Q3 2026 YTD

Q3 2026 YTD Operating Cash Flow Allocation*

* Chart segments are indicative only

Primary Capital – Sustaining Capital, Dividend and Strengthening the Balance Sheet

Excess Capital – Share Buyback

Value Creation – Acquisition of Finland Properties

Value Creation – Growth Capital and Strategic Investments

20-30%
Expected production growth beginning in the early 2030s

51%
Free cash flow[1] returned to shareholders Q3 2026 YTD, exceeding 40% target[2]

~$7.1B
Cumulative returns to shareholders from 1983 to Q3 2026[2,3]

~$3.4B
Net cash[1] position as at September 30, 2026

[1] These are non-GAAP measures, see Notes to Investors Regarding Certain Measures of Performance in the appendix
[2] Through dividends and share buybacks
[3] Calculated as $5.5B cumulative dividends declared since 1983 plus $1.6B cumulative shares repurchased under the Normal Course Issuer Bid since 2022

Quebec, Nunavut, Finland – Resilient Operational Execution

Q3 2026 Results

- Barnat pit operations restarted on schedule on September 27, 2026 with remediation activities completed
- Strong production at Kittila, Quebec production in line with plan and Nunavut affected by lower gold grades
- Continued improvement in mill recoveries at Kittila

Optimization Initiatives

- Continued progress on autonomous trucking at LZ5, increasing hauling performance by ~32% during fully automated shifts compared to Q2 2026
- Underground fleet management system – Hardware installation on LZ5 haulage fleet completed, with dispatch connectivity performing well

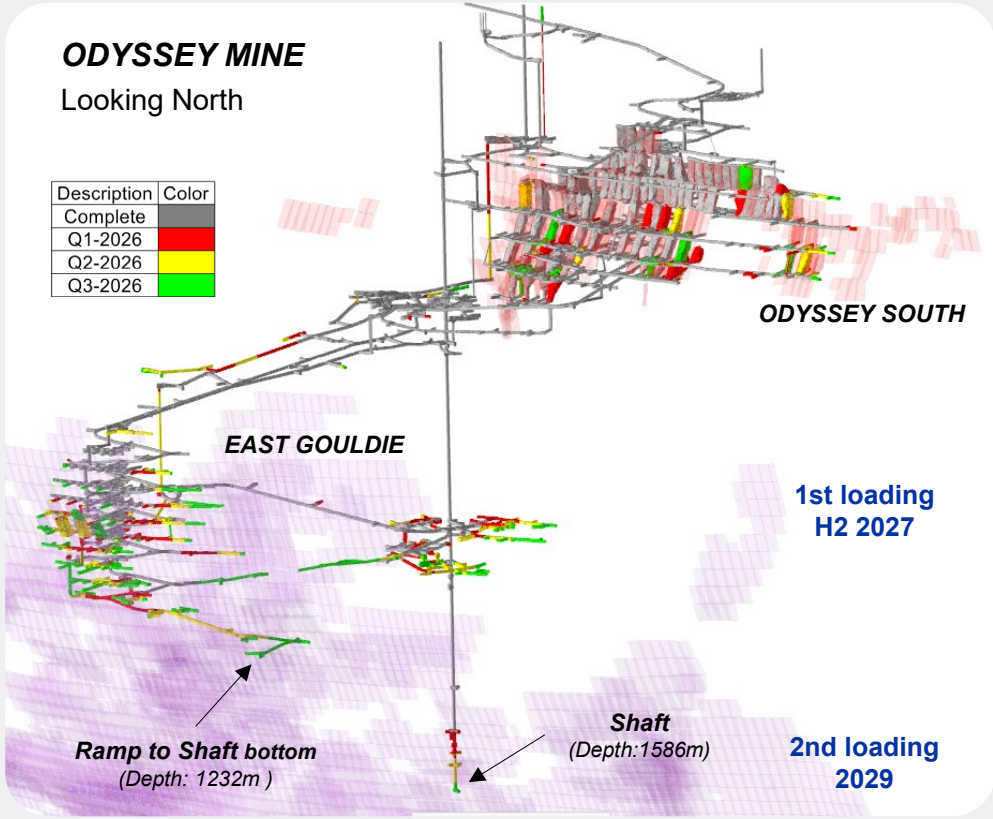

Region	Q3 2026 Gold Prod. (koz)	Q3 2026 Prod. Costs ($/oz)	Q3 2026 TCC[1] ($/oz)	Q3 2026 Gross Margin[2] ($M)	Q3 YTD 2026 Gold Prod. (koz)	Q3 YTD 2026 Prod. Costs ($/oz)	Q3 YTD 2026 TCC[1] ($/oz)	Q3 YTD 2026 Gross Margin[2] ($M)
Quebec	218	$1,316	$1,238	$568	741	$1,113	$1,101	$2,147
Nunavut	212	$1,240	$1,117	$495	617	$1,315	$1,118	$1,676
Finland	60	$1,231	$1,162	$161	170	$1,229	$1,195	$482

[1] "TCC" represents Total Cast Costs; this is a non-GAAP measure, see Notes to Investors Regarding Certain Measures of Performance in the appendix
[2] Gross margin is calculated as revenues from mining operations less production costs and amortization of property, plant and mine development

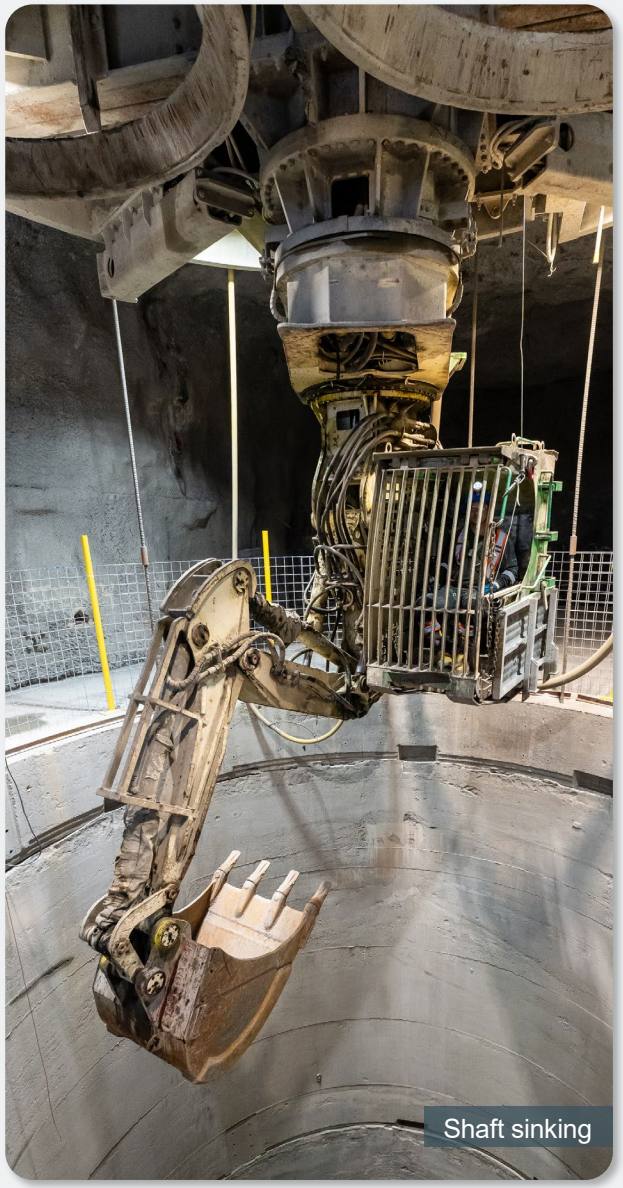

Canadian Malartic – Pathway to 1Moz Annual Producer

- Advancing development and infrastructure at East Gouldie
  - Extraction of first 4 stopes via ramp Q3 YTD 2026
  - First production via shaft expected in Q2 2027
- Exploration drilling yields positive results at Odyssey and Marban, extending mineralization envelope

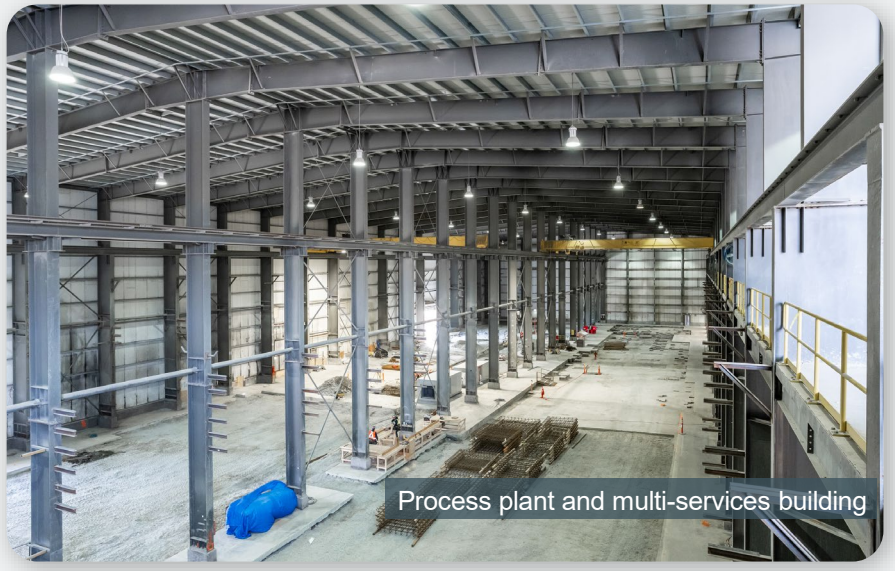

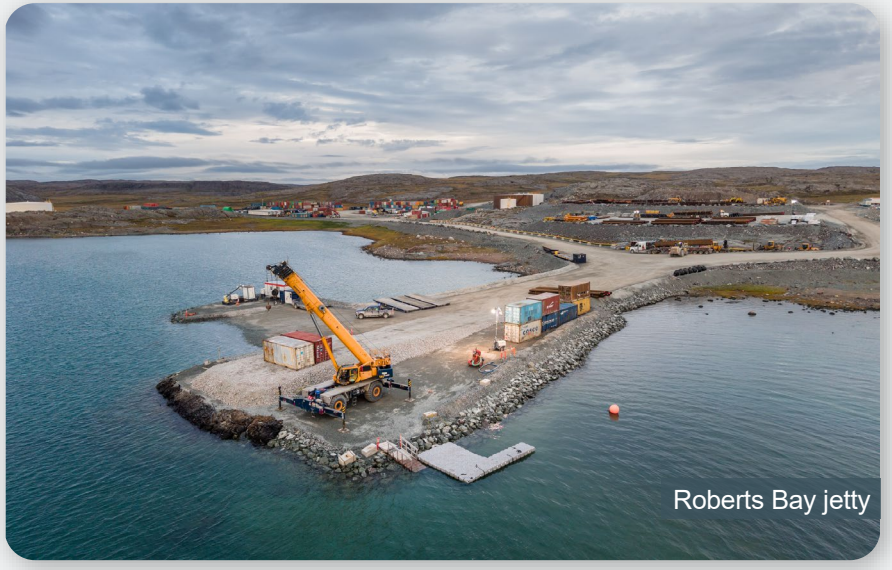

Hope Bay – The Next Multi-Decade Producer in Nunavut

- 2026 sealift completed – 11 vessels including wind turbine and fuel
- Construction progress at ~13% as at September 30, 2026
- Signed a renewed Inuit Impact and Benefit Agreement with the Kitikmeot Inuit Association, extending to 2056

Process plant and multi-services building

Power plant construction

Patch 7 underground portal

Roberts Bay jetty

Wind turbine blade

Ontario, Australia, Mexico – Operational Performance Ahead of Plan

Q3 2026 Results

- Strong production led by Detour Lake and Fosterville
- Record quarterly tonnes extracted from the Detour Lake open pit for third consecutive quarter
- Record mill throughput achieved at Macassa for third consecutive quarter

Optimization Initiatives

- Initiated trials to extend haul truck service intervals from 500 to 750 hours at Detour Lake, increasing equipment availability and reducing spare parts and labour costs
- Completed tele-remote expansion at Macassa, moving >36,000 tonnes remotely in Q3 2026, with a focus on high-heat areas

	Q3 2026				Q3 YTD 2026			
Region	Gold Prod. (koz)	Prod. Costs ($/oz)	TCC[1] ($/oz)	Gross Margin[2] ($M)	Gold Prod. (koz)	Prod. Costs ($/oz)	TCC[1] ($/oz)	Gross Margin[2] ($M)
Ontario	264	$927	$969	$807	784	$905	$960	$2,566
Australia	40	$1,167	$1,189	$97	124	$1,165	$1,141	$341
Mexico[3]	20	$2,804	$2,093	$24	59	$3,084	$2,080	$95

[1] "TCC" represents Total Cast Costs; this is a non-GAAP measure, see Notes to Investors Regarding Certain Measures of Performance in the appendix
[2] Gross margin is calculated as revenues from mining operations less production costs and amortization of property, plant and mine development
[3] For Q3 2026 excludes gold production at La India and Creston Mascota of 557 and 115 ounces, respectively, which were produced from residual leaching.
For Q3 YTD 2026 excludes gold production at La India and Creston Mascota of 1,415 and 249 ounces, respectively, which were produced from residual leaching

Detour Lake – Pathway to 1Moz Annual Producer

- Advancing exploration ramp and overburden excavation of conveyor ramp portal
- High-intensity drilling program in West Pit zone near the exploration ramp yielding positive results
- Drilling further defined high-grade domains and West Extension zone

Camp extension

Ramp development

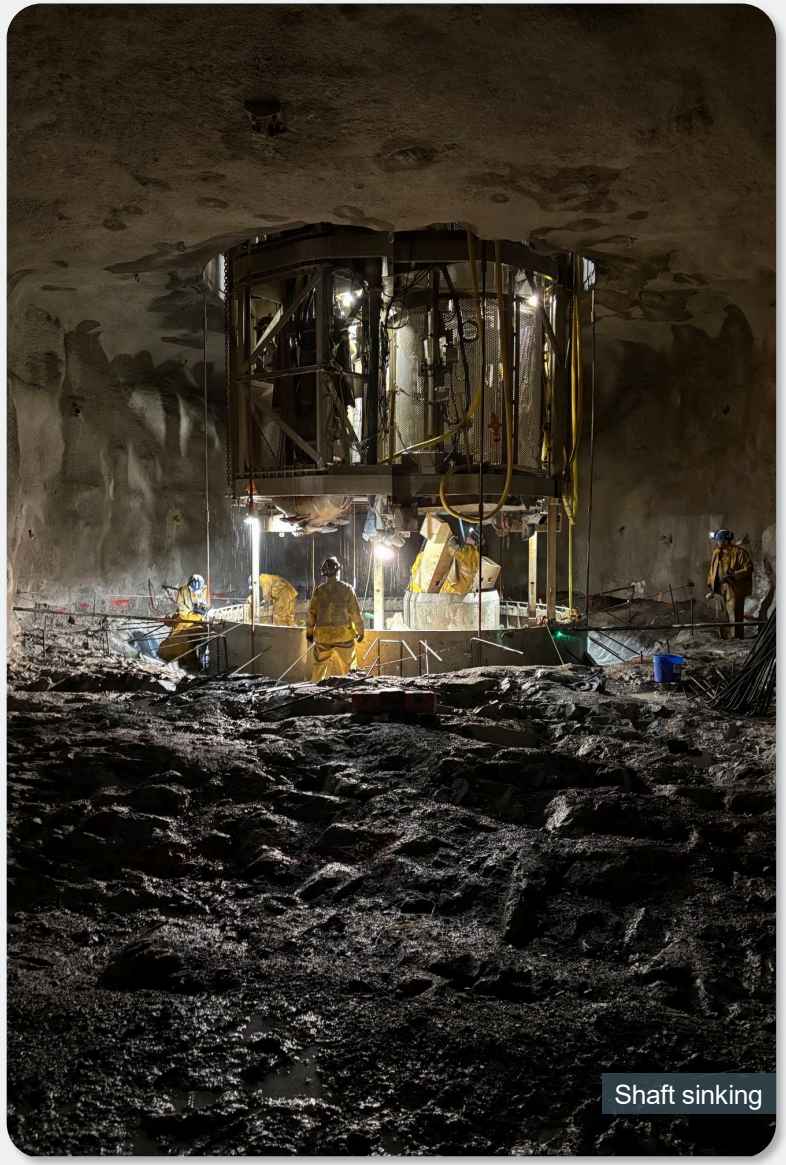

Underground portal

Conveyor ramp portal

Upper Beaver – Annual Producer with 200koz+ in Kirkland Lake Camp

- Development of exploration ramp and exploration shaft continues to advance
- High-intensity drilling program targeting zone at 500-600m depth completed
- Evaluating opportunities to expand exploration activities, including extending the shaft to 1,220m depth

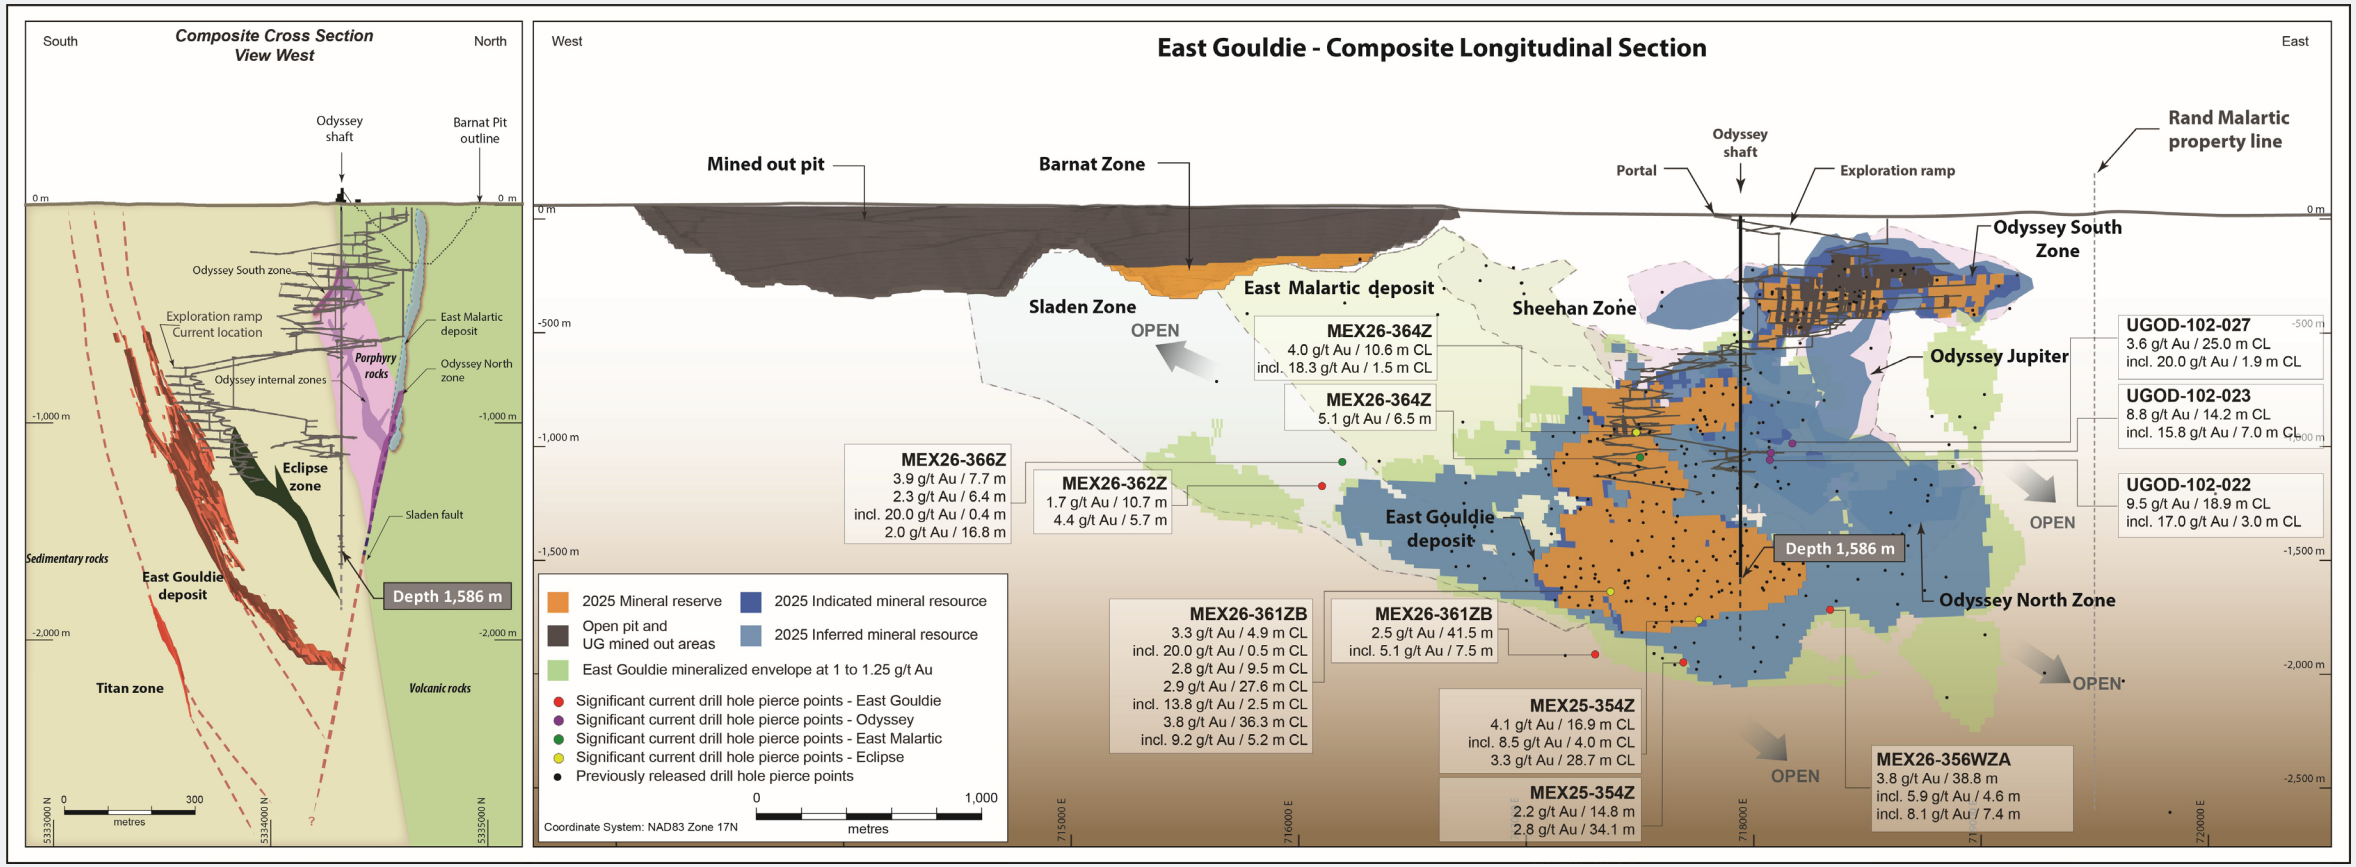

Odyssey – Growing a World-Class Asset

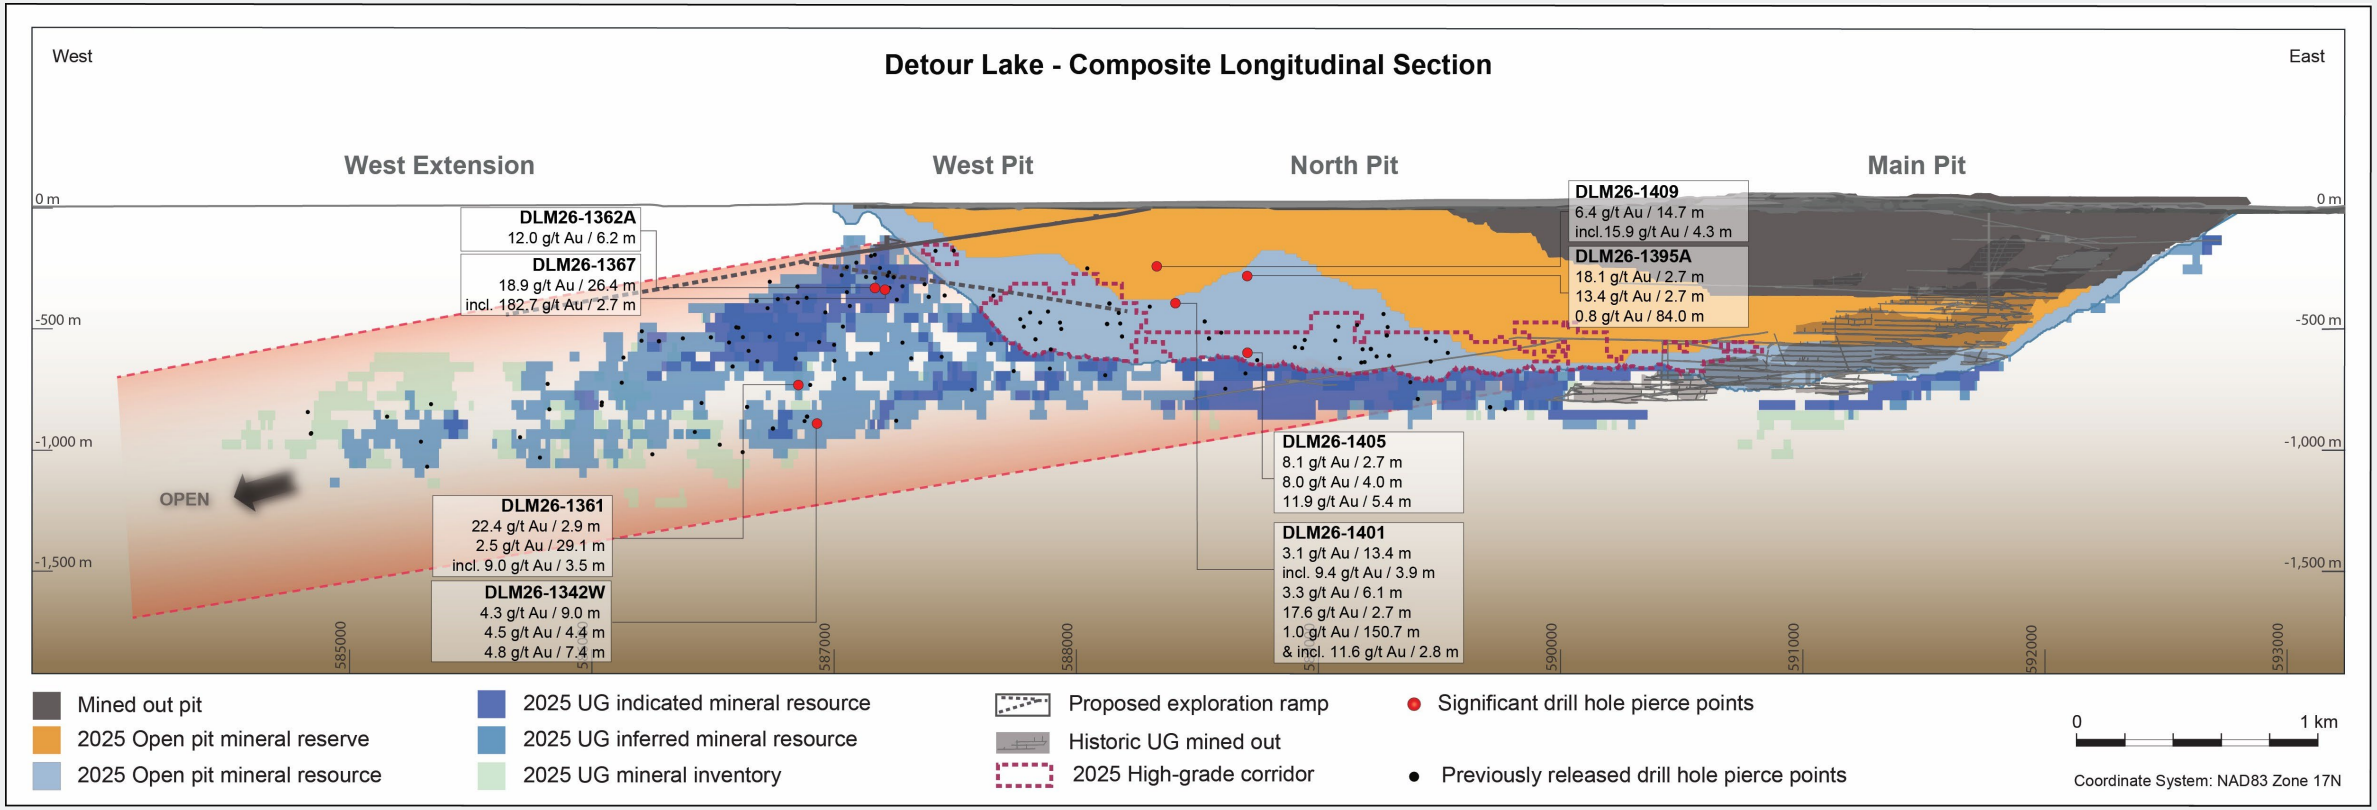

- **East Gouldie deposit** – Drilling continues to return high-grade results in the deeper areas of the East Gouldie deposit and demonstrate the potential to extend mineralization at depth
- **Eclipse zone** – Drilling confirmed and extended the zone
- **Odyssey North zone** – Drilling intersected significant mineralization within the internal Artemis porphyry sub-zone

Highlight Intercepts

- East Gouldie deposit – 2.8 g/t gold over 34.1m at 1,951m depth
- Eclipse zone – 3.8 g/t gold over 36.3m (core length) at 1,622m depth
- Odyssey North zone – 9.5 g/t gold over 18.9m (core length) at 1,061m depth

Detour Lake – Canada's Largest Gold Mine with Room to Grow

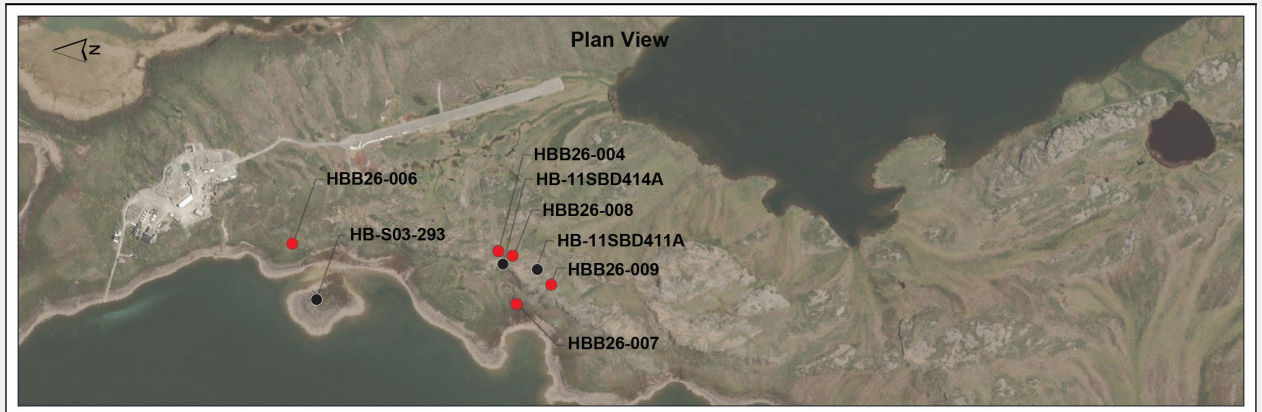

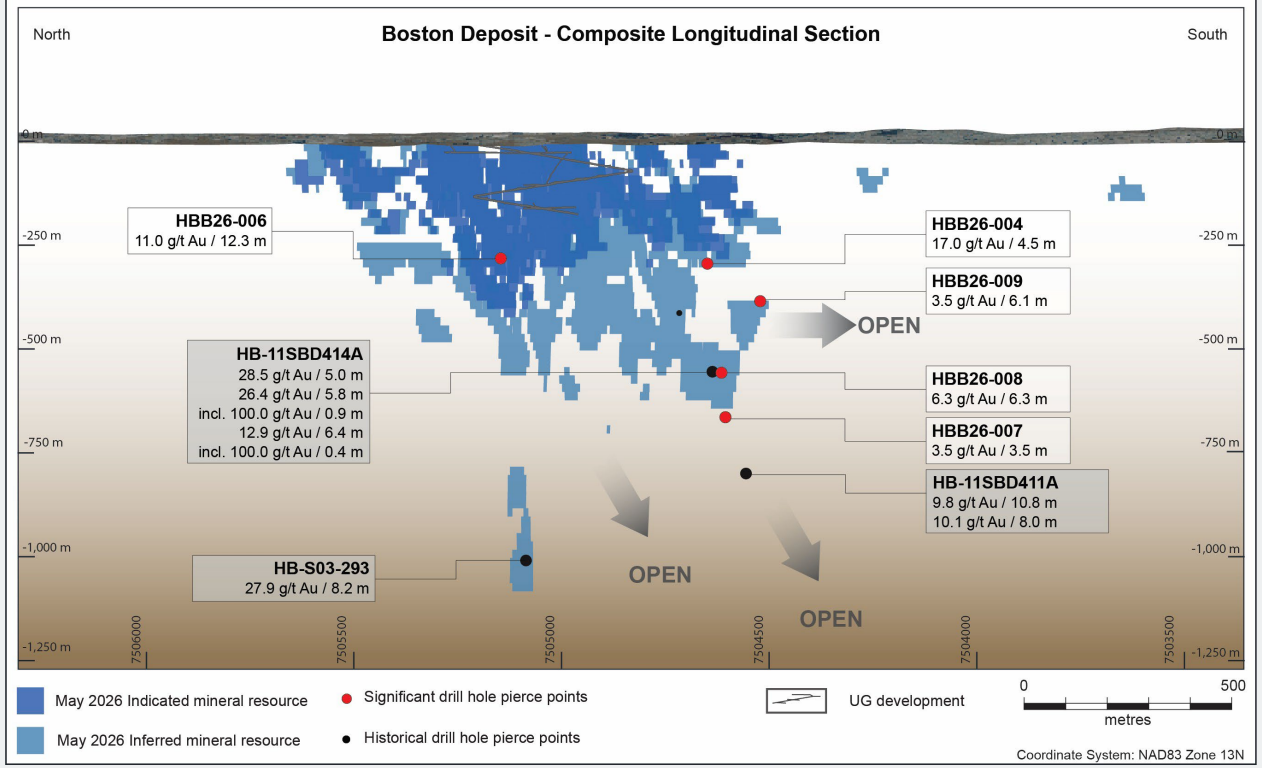

- **West Pit zone** – Conversion drilling below the current open pit mineral reserve continued to generate positive results
- **West Pit zone** – Continued high-intensity drilling program to test the proposed underground bulk sample area near the planned exploration ramp
- **West Extension zone** – Drilling ~1.0 km west of the mineral resource pit outline continued to extend the underground mineral potential to the west

Highlight Intercepts

- West Pit zone – 11.9 g/t gold over 5.4m at 583m depth
- West Pit zone – 18.9 g/t gold over 26.4m at 331m depth
- West Extension zone – 22.4 g/t gold over 2.9m at 682m depth
- West Extension zone – 4.8 g/t gold over 7.4m at 894m depth

Hope Bay – Exploration Drilling at Boston Yields Positive Results

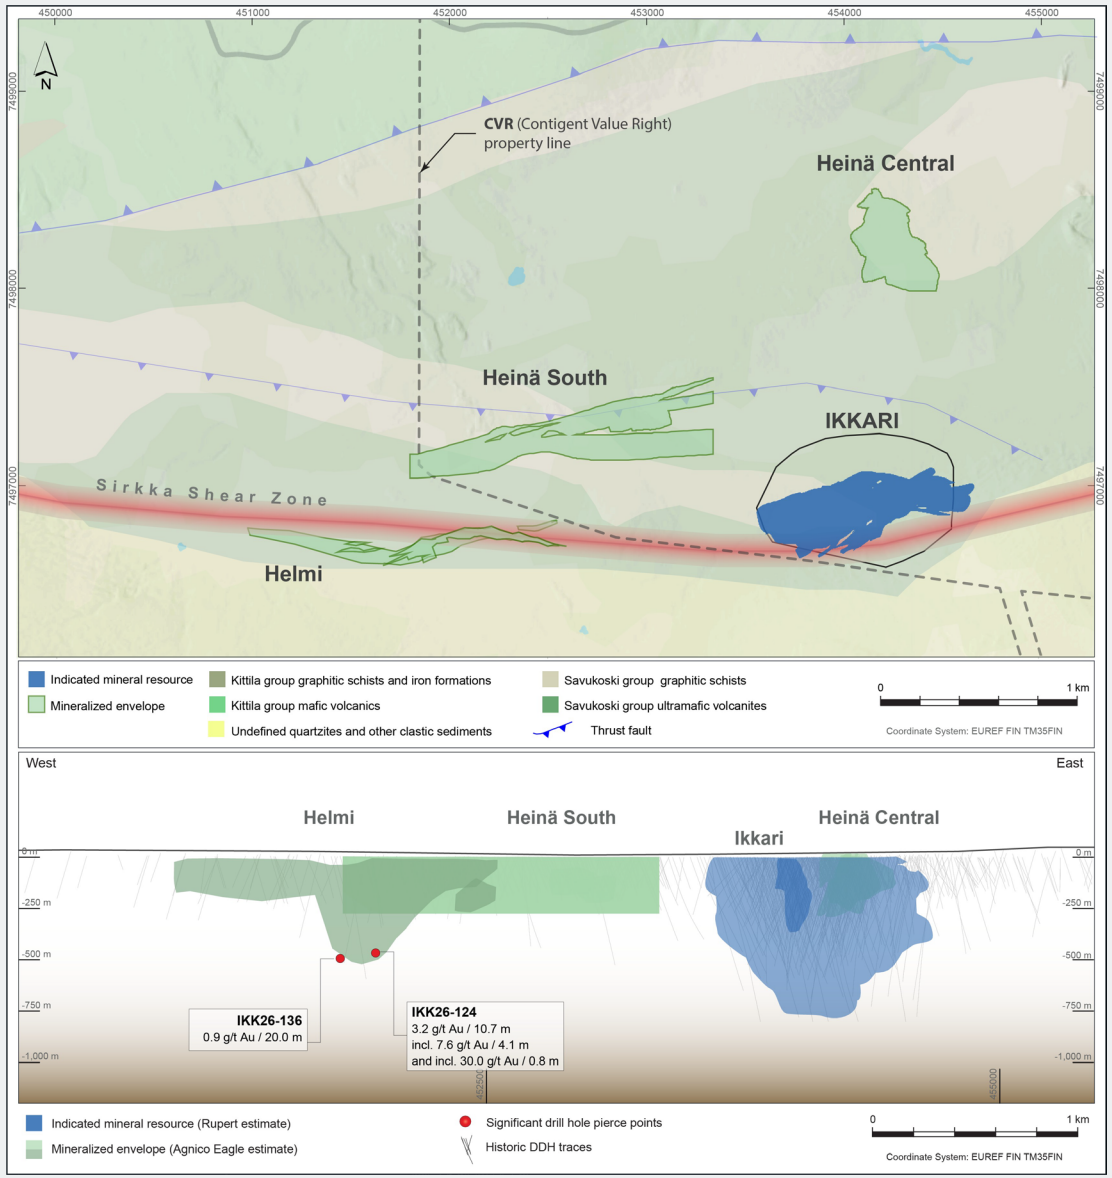

- **Patch 7 zone** – Conversion drilling program continued to demonstrate the strong continuity of the high-grade mineralization, which remains open along strike and at depth
- **Boston deposit** – First drill campaign since 2019 returned positive results and demonstrated the potential for mineral resource expansion at shallow and moderate depths of the deposit, which remains open laterally and at depth.

Highlight Intercepts

- Patch 7 zone – 37.1 g/t gold over 2.8m at 686m depth
- Patch 7 zone – 8.5 g/t gold over 8.6m at 413m depth
- Boston deposit – 11.0 g/t gold over 12.3m at 298m depth
- Boston deposit – 17.0 g/t gold over 4.5m at 308m depth
- Boston deposit – 6.3 g/t gold over 6.3m at 565m depth

Ikkari – Ramping-Up Exploration Drilling Along Ikkari Trend

- **Ikkari** – Condemnation drilling at Ikkari ongoing to support infrastructure placement and project development planning
- **Helmi** – Exploration drilling yields positive results, highlighting potential to extend mineralization envelope at depth and eastwards along strike towards Ikkari
- Additional step-out drilling planned along the Ikkari trend, supported by expanded exploration capacity with five drill rigs operating on the property in Q4 2026

Highlight Intercepts

- Helmi – 3.2 g/t gold over 10.7m at 476m depth
- Helmi – 0.9 g/t gold over 20.0m at 496m depth

High-Quality Business Generating Strong Returns

AGNICO EAGLE

Low-Risk Mining Jurisdictions

- Multi-mine, multi-decade geologic potential
- Multi-decade political stability
- Regional focus maintaining a manageable business

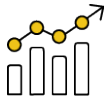

Highest Quality Senior Gold Producer

- High sustainability standards with multi-decade investment horizon
- Disciplined capital investments based on technical and regional knowledge
- Creating value through the drill bit and technical expertise

Strategic Regional Focus

- High-quality project pipeline in core operating regions with unique potential to leverage existing assets
- Competitive advantage from over 60 years of operations in Canada
- Unique mining expertise in Nunavut

Strong Financial Returns

- Emphasis on per share value creation
- Strong financial position to fund growth projects, strengthen balance sheet and return capital to shareholders
- 43 consecutive years of dividend payments

Appendix

Hope Bay – Gold Mineral Reserves and Mineral Resources (May 19, 2026)*

Mineral Reserves as at May 19, 2026					
Operation		Proven & Probable			
Gold	Mining Method**	000 Tonnes	g/t	000 Oz Au	Metallurgical Recovery (%)
Hope Bay	U/G	—	—	—	—

Mineral Resources as at May 19, 2026												
Operation		Measured			Indicated			Measured & Indicated			Inferred		
Gold	Mining Method**	000 Tonnes	g/t	000 Oz Au	000 Tonnes	g/t	000 Oz Au	000 Tonnes	g/t	000 Oz Au	000 Tonnes	g/t	000 Oz Au
Hope Bay	U/G	93	6.77	20	31,880	5.63	5,771	31,972	5.63	5,791	17,334	5,97	3,326

* See AEM May 19, 2026 news release for further details on the 2026 Hope Bay update and mineral reserves and mineral resources as at May 19, 2026
** Underground ("U/G")

The Hope Bay mineral resources as at May 19, 2026, are reported at cut-off grade varying between 3.20 and 3.26 g/t gold. The gold price used in the calculation of the cut-off grade is $2,000 per ounce and the C$/US$ exchange rate is 1.34. Underground measured and indicated mineral resources are reported within mineable shapes and include internal and external dilution. Inferred mineral resources are reported within mineable shapes and include internal dilution. No mining recovery is applied.

Mineral reserve and mineral resource estimates for Hope Bay have been approved by Dyane Duquette, P.Geo., Vice-President, Mineral Resources Management, who is a "Qualified Person" for the purposes of NI 43-101.

Notes to Investors Regarding Certain Project Evaluations

The forecast parameters surrounding certain projects, including Detour Lake underground, Upper Beaver, Hope Bay and the "fill-the-mill" strategy at Canadian Malartic (Odyssey Shaft #1, Odyssey Shaft #2, Marban, Wasamac), were based on internal evaluations, which are preliminary in nature and include inferred mineral resources that are too speculative geologically to have economic considerations applied to them that would enable them to be categorized as mineral reserves and there is no certainty that the forecast production amounts will be realized.

The basis for the internal evaluations and the qualifications and assumptions made by the qualified persons who undertook the internal evaluations are set out in this presentation and the news releases dated June 29, 2024 for Detour Lake underground, dated July 31, 2024 for Upper Beaver and dated May 19, 2026 for Hope Bay. The results of the internal evaluations had no impact on the results of any pre-feasibility or feasibility study. An updated internal evaluation is expected for the 'fill-the-mill" strategy at Canadian Malartic, for Detour Lake and Upper Beaver in 2027.

2025 Gold Mineral Reserves and Mineral Resources*

*Open Pit ("O/P"), Underground ("U/G")
[1] LaRonde mine: Net smelter value cut-off varies according to mining type and depth, not less than C$95/t for LP1 (Area 11-3) and not less than C$228/t for LaRonde.
[2] LaRonde Zone 5: Gold cut-off grade varies according to stope size and depth, not less than 1.46 g/t.
[3] Canadian Malartic: Gold cut-off grade is 0.35 g/t.
[4] Marban deposit: Gold cut-off grade is 0.31 g/t.
[5] Odyssey deposit: Gold cut-off grade varies according to mining zone and depth, not less than 1.44 g/t.
[6] East Gouldie: Gold cut-off grade not less than 1.57 g/t.
[7] Goldex: Gold cut-off grade varies according to mining type and depth, not less than 1.00 g/t.
[8] Akasaba West: Net smelter value cut-off varies, not less than C$33.28/t.
[9] Detour Lake: Gold cut-off grade is 0.27 g/t.
[10] Macassa: Gold cut-off grade varies according to mining type, not less than 3.35 g/t for long hole method and 3.78 g/t for cut and fill method.
[11] Macassa Near Surface deposit: Gold cut-off grade not less than 2.10 g/t.
[12] Amalgamated Kirkland ("AK") deposit: Gold cut-off grade not less than 2.10 g/t.
[13] Upper Beaver: Net smelter value cut-off varies according to mining type, not less than C$118.17/t for underground and C$43.49/t for open pit.
[14] Hammond Reef: Gold cut-off grade is 0.41 g/t.
[15] Amaruq: Gold cut-off grade varies according to mining type, not less than 0.98 g/t for open pit mineral reserves and 3.05 g/t for underground mineral reserves (gold cut-off grade for marginal underground mineral reserves from development is 1.17 g/t).
[16] Meliadine: Gold cut-off grade varies according to mining type, not less than 1.50 g/t for open pit mineral reserves and 3.90 g/t for underground mineral reserves (gold cut-off grade for marginal underground mineral reserves from development is 1.50 g/t).
[17] Hope Bay: Gold cut-off grade not less than 4.00 g/t.
[18] Fosterville: Gold cut-off grade varies according to mining zone and type, not less than 3.00 g/t.
[19] Kittila: Gold cut-off grade varies according to haulage distance, not less than 2.63 g/t.
[20] Pinos Altos: Net smelter value cut-off varies according to mining zone and type, not less than C$25.44/t for open pit mineral reserves and US$85.97/t for the underground mineral reserves.
[21] San Nicolás (50%): Net smelter return cut-off values for low zinc/copper ore of $9.71/t and for high zinc/copper ore of $13.15/t.

Notes to Investors

Notes to Investors Regarding the Use of Mineral Resources

The mineral reserve and mineral resource estimates contained in this presentation have been prepared in accordance with the Canadian Securities Administrators' (the "CSA") National Instrument 43-101 – *Standards of Disclosure for Mineral Projects* ("NI 43-101").

The SEC's disclosure requirements and policies for mining properties now more closely align with current industry and global regulatory practices and standards, including NI 43-101; however Canadian issuers that report in the United States using the Multijurisdictional Disclosure System ("MJDS"), such as the Company, may still use NI 43-101 rather than the SEC disclosure requirements when using the SEC's MJDS registration statement and annual report forms. Accordingly, mineral reserve and mineral resource information contained in this presentation may not be comparable to similar information disclosed by U.S. companies.

Investors are cautioned that while the SEC recognizes "measured mineral resources", "indicated mineral resources" and "inferred mineral resources", investors should not assume that any part or all of the mineral deposits in these categories will ever be converted into a higher category of mineral resources or into mineral reserves. These terms have a great amount of uncertainty as to their economic and legal feasibility. **Accordingly, investors are cautioned not to assume that any "measured mineral resources", "indicated mineral resources" or "inferred mineral resources" that the Company reports in this presentation are or will be economically or legally mineable.**

Further, "inferred mineral resources" have a great amount of uncertainty as to their existence and as to their economic and legal feasibility. It cannot be assumed that any part or all of an inferred mineral resource will ever be upgraded to a higher category. Under Canadian regulations, estimates of inferred mineral resources may not form the basis of feasibility or pre-feasibility studies, except in limited circumstances. Investors are cautioned not to assume that all or any part of an inferred mineral resource exists, or is or will ever be economically or legally mineable.

The mineral reserve and mineral resource data set out in this presentation are estimates, and no assurance can be given that the anticipated tonnages and grades will be achieved or that the indicated level of recovery will be realized. The Company does not include equivalent gold ounces for by-product metals contained in mineral reserves in its calculation of contained ounces. Mineral reserves are not reported as a subset of mineral resources.

Scientific and Technical Information

The scientific and technical information contained in this presentation relating to Nunavut, Quebec and Finland operations has been approved by Dominique Girard, Eng., Executive Vice-President & Chief Operating Officer – Nunavut, Quebec & Europe; relating to Ontario, Australia and Mexico operations has been approved by Natasha Vaz, P.Eng., Executive Vice-President & Chief Operating Officer – Ontario, Australia & Mexico; relating to exploration has been approved by Guy Gosselin, Eng. and P.Geo., Executive Vice-President, Exploration; and relating to mineral reserves and mineral resources has been approved by Dyane Duquette, P.Geo., Vice-President, Mineral Resources Management, each of whom is a "Qualified Person" for the purposes of NI 43-101.

Mineral reserves reported are not included in mineral resources. Tonnage amounts and contained metal amounts set out in this table have been rounded to the nearest thousand, so may not aggregate to equal column or row totals. Mineral reserves are in-situ, taking into account all mining recoveries, before mill or heap leach recoveries. Underground mineral reserves and measured and indicated mineral resources are reported within mineable shapes and include internal and external dilution. Inferred mineral resources are reported within mineable shapes and include internal dilution. Mineable shape optimization parameters may differ for mineral reserves and mineral resources.

The mineral reserves and mineral resources tonnages reported for silver, copper and zinc are a subset of the mineral reserves and mineral resources tonnages for gold. The Company's economic parameters set the maximum price allowed to be no more than the lesser of the three-year moving average and current spot price, which is a common industry standard. Given the current commodity price environment, Agnico Eagle continues to use more conservative gold and silver prices.

The below metal price assumptions are all below the three-year historic averages (from January 1, 2023 to December 31, 2025) of approximately $2,606 per ounce of gold, $30.64 per ounce of silver, $4.32 per pound of copper and $1.26 per pound of zinc.

Metal Price for Mineral Reserve Estimation*

Gold ($/oz)	Silver ($/oz)	Copper ($/lb)	Zinc ($/lb)
$1,600	$24.00	$3.80	$1.20

**Exceptions: $1,350 per ounce of gold used for Hammond Reef; $1,500 per ounce of gold used for Detour Lake open pit; $1,650 per ounce of gold used for Wasamac and Marban; $2,000 per ounce of gold for Amaruq; $1,450 per ounce of gold and $3.75 per pound of copper used for Upper Beaver; $2,000 per ounce of gold and $27.00 per ounce of silver used for Pinos Altos; and $1,300 per ounce of gold, $20.00 per ounce of silver, $3.00 per pound of copper and $1.10 per pound of zinc used for San Nicolás.*

Exchange Rates*

C$ per US$1.00	MXN per US$1.00	A$ per US$1.00	€ per US$1.00
C$1.34	MXP18.00	A$1.52	€0.91

**Exceptions: exchange rate of C$1.25 per US$1.00 used for Holt complex and Detour Lake Zone 58N; US$1.15 per €1.00 used for Barsele; C$1.30 per US$1.00 used for Detour Lake open pit, Detour Lake underground, Hammond Reef and Anoki-McBean; and A$1.45 per US$1.00 used for Northern Territory.*

Metal Price for Mineral Resource Estimation*

Gold ($/oz)	Silver ($/oz)	Copper ($/lb)	Zinc ($/lb)
$2,000	$25.00	$4.00	$1.30

**Exceptions: $1,200 per ounce of gold used for Holt complex; $1,300 per ounce of gold used for Detour Lake Zone 58N; $1,500 per ounce of gold used for Northern Territory; $1,533 per ounce of gold used for Barsele; $1,600 per ounce of gold used for Canadian Malartic; $1,650 per ounce of gold used for La India; $1,688 per ounce of gold used for Hammond Reef, Anoki-McBean and Tarachi; $1,750 per ounce of gold used for Upper Beaver, Wasamac and Aquarius; $1,800 per ounce of gold used for Marban; $1,900 per ounce of gold used for Marban Regional and Akasaba Regional; $2,400 per ounce of gold used for Amaruq; $1,688 per ounce of gold and $25.00 per ounce of silver used for Santa Gertrudis; $1,300 per ounce of gold, $20.00 per ounce of silver, $3.00 per pound of copper and $1.10 per pound of zinc used for San Nicolás; $2,400 per ounce of gold and $28.00 per ounce of silver used for Pinos Altos.*

Notes to Investors

Notes to Investors Regarding the Use of Mineral Resources

NI 43-101 requires mining companies to disclose mineral reserves and mineral resources using the subcategories of "proven mineral reserves", "probable mineral reserves", "measured mineral resources", "indicated mineral resources" and "inferred mineral resources". Mineral resources that are not mineral reserves do not have demonstrated economic viability.

A mineral reserve is the economically mineable part of a measured and/or indicated mineral resource. It includes diluting materials and allowances for losses, which may occur when the material is mined or extracted and is defined by studies at prefeasibility or feasibility level as appropriate that include application of modifying factors. Such studies demonstrate that, at the time of reporting, extraction could reasonably be justified. The mineral reserves presented in this presentation are separate from and not a portion of the mineral resources.

Modifying factors are considerations used to convert mineral resources to mineral reserves. These include, but are not restricted to, mining, processing, metallurgical, infrastructure, economic, marketing, legal, environmental, social and governmental factors.

A proven mineral reserve is the economically mineable part of a measured mineral resource. A proven mineral reserve implies a high degree of confidence in the modifying factors. A probable mineral reserve is the economically mineable part of an indicated and, in some circumstances, a measured mineral resource. The confidence in the modifying factors applied to a probable mineral reserve is lower than that applied to a proven mineral reserve.

A mineral resource is a concentration or occurrence of solid material of economic interest in or on the Earth's crust in such form, grade or quality and quantity that there are reasonable prospects for eventual economic extraction. The location, quantity, grade or quality, continuity and other geological characteristics of a mineral resource are known, estimated or interpreted from specific geological evidence and knowledge, including sampling.

A measured mineral resource is that part of a mineral resource for which quantity, grade or quality, densities, shape and physical characteristics are estimated with confidence sufficient to allow the application of modifying factors to support detailed mine planning and final evaluation of the economic viability of the deposit. Geological evidence is derived from detailed and reliable exploration, sampling and testing and is sufficient to confirm geological and grade or quality continuity between points of observation. An indicated mineral resource is that part of a mineral resource for which quantity, grade or quality, densities, shape and physical characteristics are estimated with sufficient confidence to allow the application of modifying factors in sufficient detail to support mine planning and evaluation of the economic viability of the deposit. Geological evidence is derived from adequately detailed and reliable exploration, sampling and testing and is sufficient to assume geological and grade or quality continuity between points of observation. An inferred mineral resource is that part of a mineral resource for which quantity and grade or quality are estimated on the basis of limited geological evidence and sampling. Geological evidence is sufficient to imply but not verify geological and grade or quality continuity.

Investors are cautioned not to assume that part or all of an inferred mineral resource exists, or is economically or legally mineable.

A feasibility study is a comprehensive technical and economic study of the selected development option for a mineral project that includes appropriately detailed assessments of applicable modifying factors, together with any other relevant operational factors and detailed financial analysis that are necessary to demonstrate, at the time of reporting, that extraction is reasonably justified (economically mineable). The results of the study may reasonably serve as the basis for a final decision by a proponent or financial institution to proceed with, or finance, the development of the project. The confidence level of the study will be higher than that of a pre-feasibility study.

Additional Information

Additional information about each of the Company's material mineral projects as at December 31, 2025, including information regarding data verification, key assumptions, parameters and methods used to estimate mineral reserves and mineral resources and the risks that could materially affect the development of the mineral reserves and mineral resources required by sections 3.2 and 3.3 and paragraphs 3.4(a), (c) and (d) of NI 43-101 can be found in the Company's AIF and 2025 MD&A filed on SEDAR+ and with the SEC on EDGAR and in the following technical reports filed on SEDAR+ in respect of the Company's material mineral properties: Detour Lake Operation, Ontario, Canada, NI 43-101 Technical Report (September 20, 2024); NI 43-101 Technical Report of the LaRonde complex in Quebec, Canada (March 24, 2023); NI 43-101 Technical Report Canadian Malartic Mine, Quebec, Canada (March 25, 2021); Technical Report on the Mineral Resources and Mineral Reserves at Meadowbank Gold complex including the Amaruq Satellite Mine Development, Nunavut, Canada as at December 31, 2017 (February 14, 2018); and the Updated Technical Report on the Meliadine Gold Project, Nunavut, Canada (February 11, 2015).

Forward-Looking Non-GAAP Measures

This presentation contains information regarding estimated future total cash costs per ounce, minesite costs per tonne and AISC per ounce. The estimates are based upon the total cash costs per ounce, minesite costs per tonne and AISC per ounce that the Company expects to incur to mine gold at its mining operations and do not include certain costs that will vary over time as each project is developed and mined. It is therefore not practicable to reconcile these forward-looking non-GAAP financial measures to the most comparable IFRS Accounting Standards measure.

Notes to Investors Regarding Production Guidance

The gold production guidance is based on the Company's mineral reserves but includes contingencies and assumes metal prices and foreign exchange rates that are different from those used in the mineral reserve estimates. These factors and others mean that the gold production guidance presented in this presentation does not reconcile exactly with the production models used to support these mineral reserves.

Notes to Investors Regarding Certain Measures of Performance

This presentation discloses certain financial performance measures, including "total cash costs per ounce", "all-in sustaining costs per ounce" (or "AISC per ounce"), "adjusted net income", "adjusted EBITDA", “capital expenditures”, "free cash flow“ and "net cash", as well as, for certain of these measures their related per share ratios that are not standardized measures under IFRS Accounting Standards. These measures and ratios may not be comparable to similar measures and ratios reported by other gold producers and should be considered together with other data prepared in accordance with IFRS Accounting Standards. See AEM Management’s Discussion and Analysis ("MD&A") dated October 28, 2026 under the caption “Non-GAAP Financial Performance Measures” for a reconciliation of these measures to the most directly comparable financial information reported in the consolidated financial statements prepared in accordance with IFRS Accounting Standards, which is incorporated by reference herein.
