Investor Presentation

Forward-Looking Statement

This presentation contains forward-looking statements that reflect our current expectations and views of future events, all of which are subject to risks and uncertainties. Forward-looking statements give our current expectations or forecasts of future events. You can identify these statements by the fact that they do not relate strictly to historical or current facts. You can find many (but not all) of these statements by the use of words such as “approximates,” “believes,” “hopes,” “expects,” “anticipates,” “estimates,” “projects,” “intends,” “plans,” “will,” “would,” “should,” “could,” “may” or other similar expressions in this presentation. These statements are likely to address our growth strategy, financial results and product and development programs. You must carefully consider any such statements and should understand that many factors could cause actual results to differ from our forward-looking statements. These factors may include inaccurate assumptions and a broad variety of other risks and uncertainties, including some that are known and some that are not. No forward-looking statement can be guaranteed and actual future results may vary materially. Factors that could cause actual results to differ from those discussed in the forward-looking statements include, but are not limited to: assumptions about our future financial and operating results, including revenue, income, expenditures, cash balances, and other financial items; our ability to execute our growth, and expansion, including our ability to meet our goals; current and future economic and political conditions; our capital requirements and our ability to raise any additional financing which we may require; our ability to attract clients and further enhance our brand recognition; our ability to hire and retain qualified management personnel and key employees in order to enable us to develop our business; the COVID-19 pandemic; trends and competition in the veterinary vaccine industry; and other assumptions described in this presentation underlying or relating to any forward-looking statements.

We describe certain material risks, uncertainties and assumptions that could affect our business, including our financial condition and results of operations, under “Risk Factors.” We base our forward-looking statements on our management’s beliefs and assumptions based on information available to our management at the time the statements are made. We caution you that actual outcomes and results may, and are likely to, differ materially from what is expressed, implied or forecast by our forward-looking statements. Accordingly, you should be careful about relying on any forward-looking statements. Except as required under the federal securities laws, we do not have any intention or obligation to update publicly any forward-looking statements after the distribution of this presentation, whether as a result of new information, future events, changes in assumptions, or otherwise.

Industry Data and Forecasts: This presentation contains data related to the veterinary vaccine industry in China that we obtained from various government and private entity publications, including the industry report of Frost & Sullivan Limited (“Frost & Sullivan”) which we commissioned. This industry data includes projections that are based on a number of assumptions which have been derived from industry and government sources which we believe to be reasonable. The veterinary vaccine industry may not grow at the rate projected by industry data, or at all. The failure of the industry to grow as anticipated is likely to have a material adverse effect on our business and the market price of our Ordinary Shares. In addition, the rapidly changing nature of the veterinary vaccine industry subjects any projections or estimates relating to the growth prospects or future condition of our industry to significant uncertainties. Furthermore, if any one or more of the assumptions underlying the industry data turns out to be incorrect, actual results may, and are likely to, differ from the projections based on these assumptions.

The Production Process

We produce products and stock inventory of raw materials at the facilities, based on market demand, orders it receives/plans to receive, production plan and capacity, and procurement information from distributors.

Investment Highlights

Diversified Products – Commercialized Products

Diversified Products – Commercialized Products

New Product Development Process

New veterinary drug development is a lengthy process (5-10 years)

Steps highlighted in yellow are subject to government/regulatory approval.

High Production Quality- By GMP & ISO

Quality Control Management System

The Whole Process of Manufacturing

Raw Materials and Viral Seeds Inspection

Work in Process Check

Product Examination

Examinations

- Physical property inspection
 - the appearance
 - properties
 - dosage form
 - color
 - other aspects of the product comply with the quality standard requirements
- Sterility testing
 - tested samples should be free from bacterial contamination
- Safety testing
 - experimental animals should be no significant changes in the animals' body temperature, appetite, and activity level
- Efficacy testing
 - antibody assays
 - animal challenge studies
 -

Standards

ISO 9001:2015

ISO 14001:2015

ISO 45001:2018

We have established a comprehensive quality management system, which complies with both Good Manufacturing Practices for Veterinary Drugs and the standards of ISO 9001:2015, ISO 14001:2015, and ISO 45001:2018.

Strong R&D Capabilities – Independent R&D

- Own **1** research center, which collectively has helped the operating entity develop dozens of vaccines, inventions, and utility models.

- Have **51** experienced experts work for our R&D department with glory achievements and awards.

- Developed **10** registered trademarks, **6** registered copyrights, and **42** registered patents. Also received **16** Registration Certificates of New Veterinary Drugs in China.

Research Center

Laboratory

Strong R&D Capabilities - Cooperative R&D

- Maintained long-term cooperative relationships with universities and institutions:
 - Universities and research institutes - **early-stage basic research**
 - Our R&D - **basic research, pilot study** and **industrialization research**

- Licensed to use vaccine production technologies and related intellectual properties

- Conducted research projects solely or cooperatively with third-party local universities

Extensive Distribution Channels

**Revenue Breakdown
By Distribution Channel ***

Direct Sales Channel – 44.6% *

- Participating tender and procurement of **major breeding companies**
- **98*** direct end-user customers
- **Major customer includes the world's largest breeding company, Muyuan Foods Co., Ltd. (002714.SZ)**

Distribution Network – 52.9% *

- Domestic distributors cover **29** provincial-level administrative regions of China
- International distributors cover **Vietnam, Pakistan, and Egypt**
- **121*** distributors globally

Government Tender and Procurement – 2.5% *

- The authority arranges **one or two** tenders each year
- We are participating in **three procurement contracts**** with three provincial and local veterinary authorities

Experienced Management Team and Employees

Zhenfa Han

Director & Chairman of the Board

Director of our operating entity since April 2004 and Chairman of the Board from September 2015 to September 2018

Entry Barriers and Success Factors of China's Veterinary Vaccine Market

Market access barriers

- The product iteration speed
- Vaccine production capacity

Sales channel barriers

- A multi-channel layout of direct sales and distribution, and a sales team with wide coverage is conducive to improving market rate and achieving rapid expansion.

R&D technology & talent barriers

- A large amount of R&D investment to improve market competitiveness

01 Company and Business Overview

02 Industry Overview

03 *Growth Strategies*

04 Financial Highlights

Growth Strategies

01

Develop high-demand products and expand business by entering household animal vaccines industry

- Plan to develop Subunit Vaccine of Porcine Circovirus Type 2 (Recombinant Baculovirus Strain OKM) and other high-demand products
- Plan to develop and manufacture vaccines for companion animals

02

Expand sales and distribution network

- Continue to increase sales to existing customers and focus on developing new markets and new customers
- Entry into Southeast Asia market, in countries like Thailand and Philippines

03

Enhance the ability to attract, incentivize and retain talented professionals

- Plan to formulate a market-oriented employee compensation structure
- Plan to implement a standardized multilevel performance review mechanism

04

Merger and Acquisition Strategy

- Plan to advance merger and acquisition initiatives in 2026, with a strategic focus on the pet sector
